

TOP TIPS

TO GETTING THE RIGHT AIR CONDITIONING

WITH **DAIKIN**

1. GET AN AIR CONDITIONING EXPERT TO COME TO YOU

Air Conditioning can be confusing. Terms like 'Inverter' and 'Split' can make getting the right solution for your home a bit of a mystery. So it makes sense to talk to an expert. With over 400 Daikin Specialist Dealers across Australia, an Air Conditioning expert will visit your home. We'll answer all your questions, guide you through your choices and make sure you get the right solution for your home.

2. GET AN AIR CONDITIONING SOLUTION TAILORED TO YOUR HOME

Every home is different. And so are the needs of every family. So getting the right Air Conditioning is about choice. And the knowledge and expertise to make the right one. Daikin's range of Split, Multi-Split and Ducted units can provide the right Air Conditioning solution for any home and budget. And your Daikin Specialist Dealer can help you choose the right one for you.

3. GET AN ENERGY EFFICIENT AIR CONDITIONING SOLUTION

Getting the right product and the right installation means you will have the most energy efficient solution for your home. If a unit is too small, it will require excessive use (and energy) to heat and cool your home. And if it's too big, you'll end up paying more than you should. Your Daikin Specialist Dealer will help you select the right type of Air Conditioning, the right unit and then install and service it correctly.

4. GET PEACE OF MIND FROM SPECIALISED EXPERIENCE

In any field, experience and expertise count. They help provide peace of mind through knowing a product and/or service can be trusted to deliver world-class performance. Daikin only do one thing – Air Conditioning. And we've been doing it in Australia for over 40 years, so you know the comfort of your family is in the right hands.

5. GET THE AIR CONDITIONER WITH THE BLUE BUTTERFLY, EXCLUSIVELY APPROVED BY THE SENSITIVE CHOICE PROGRAM

Air Conditioning is more than simply heating and cooling the air in your home. Quality Air Conditioning also makes the air cleaner and more pure. Daikin's commitment to technology and innovation means only we can display the Sensitive Choice butterfly symbol on our range of Split Systems & Air Purifiers. Daikin Split System Air Conditioners have advanced air purifying filters that may help reduce some of the triggers that affect asthma and allergy sufferers and help to provide a cleaner and healthier indoor environment.

6. GET AN AIR CONDITIONING SYSTEM THAT'S RELIABLE

Reliability. That's probably top of your list when buying an Air Conditioning system – and after the investment you are about to make, that's understandable. Daikin gives you peace of mind and reassurance with their 5 year warranty, applicable to domestic products purchased and installed in Australia and New Zealand. That's how confident Daikin is about the quality and reliability of its products.

7. ENSURE YOU HAVE AFTER SALES SUPPORT – AT YOUR FINGERTIPS

What happens when you purchase an Air Conditioning system and need some help? Specialist after sales support is often hard to find and spare parts can be scarce! Daikin takes pride in providing its customers with effective and efficient after sales service support, including readily available spare parts warehoused in Australia. Daikin also has a large and experienced team of fully qualified technicians, and a wide network of authorised service agents to take on the service demands of the market.

8. A COMPANY THAT CONTRIBUTES TO THE AUSTRALIAN ECONOMY

When purchasing Air Conditioning – or anything for that matter, it is always good to support Australian products and services. Daikin has a ducted manufacturing facility in Sydney, so when purchasing locally developed units, you are contributing to the Australian economy. Daikin's call centre is also located in Australia, so you can be sure when you call Daikin, you are speaking to someone locally.
