Features

Enhanced comfort and energy savings

INTELLIGENT EYE
The INTELLIGENT EYE sensor detects human movement and adjusts the right and left airflow direction. If no one is in the room for more than 20 minutes, the operation automatically changes to energy saving operation. The INTELLIGENT EYE sensor works differently depending on the situation.  

WEEKLY TIMER
Up to 4 timer settings can be saved for each day of the week according to your family’s life style. The WEEKLY TIMER allows you to set on/off times and the desired temperature.

Other functions

COMFORT AIRFLOW
The airflow direction is upward while in COOL operation, and downward while in HEAT operation. This function prevents cold or warm air from blowing directly on your body.

OUTDOOR UNIT QUIET
OUTDOOR UNIT QUIET operation assures a low noise level of the outdoor unit. This function is useful to maintain a quiet neighbourhood.

Read Before Operation

Safety Precautions

Read the precautions in this manual carefully before operating the unit.

This appliance is filled with R32.

- Keep this manual where the user can easily find it.
- The precautions described herein are classified as WARNING and CAUTION. They both contain important information regarding safety. Be sure to observe all precautions without fail.

<table>
<thead>
<tr>
<th>WARNING</th>
<th>Failure to follow these instructions properly may result in personal injury or loss of life.</th>
</tr>
</thead>
<tbody>
<tr>
<td>CAUTION</td>
<td>Failure to observe these instructions properly may result in property damage or personal injury, which may be serious depending on the circumstances.</td>
</tr>
</tbody>
</table>

- Never attempt.
- Be sure to follow the instructions.
- Be sure to establish an earth connection.

- After reading, keep this manual in a convenient place so that you can refer to it whenever necessary. If the equipment is transferred to a new user, be sure also to hand over the manual.

**WARNING**

- Do not use means to accelerate the defrosting process or to clean, other than those recommended by the manufacturer.
- The appliance must be stored in a room without continuously operating ignition sources (for example: open flames, an operating gas appliance or an operating electric heater).
- Do not pierce or burn.
- Be aware that refrigerants may not contain an odour.
- The appliance must be installed, operated and stored in a room with floor area larger than \( \pi \cdot d^2 \) for 20/25/35 class, 2.5\( \pi \cdot d^2 \) for 46 class.
  - Since the maximum refrigerant charge of the models is below 1.22kg, it does not have any limitation for the minimum floor area.
  - Maintain an installation height of 1.8m or more from the floor surface to the bottom of the appliance. If the size of the room where the appliance is to be installed has less than the indicated minimum floor area, install it in a well ventilated room.
  - For details refer to the WARNING list in the "Safety Precautions" section of the installation manual for the outdoor unit.
- To avoid fire, explosion or injury, do not operate the unit when harmful gases (e.g. flammable or corrosive) are detected near the unit.
- Be aware that prolonged, direct exposure to cool or warm air from the air conditioner, or to air that is too cool or too warm, can be harmful to your physical condition and health.
- Do not place objects, including rods, your fingers, etc., in the air inlet or outlet. Product damage or personal injury may result due to contact with the air conditioner’s high-speed fan blades.
- Do not attempt to repair, dismantle, reinstall or modify the air conditioner yourself as this may result in water leakage, electric shock or fire hazards.
- Do not use flammable spray near the air conditioner, or otherwise fire may result.
- Do not use a refrigerant other than the one indicated on the outdoor unit (R32) when installing, moving or repairing. Using other refrigerants may cause trouble or damage to the unit, and personal injury.
- To avoid electric shock, do not operate with wet hands.

**CAUTION**

- Beware of fire in case of refrigerant leakage. If the air conditioner is not operating correctly, i.e. not generating cool or warm air, refrigerant leakage could be the cause. Consult your dealer for assistance. The refrigerant within the air conditioner is safe and normally does not leak.
  - However, in the event of a leakage, contact with a naked burner, heater or cooker may result in generation of noxious gas.
  - Do not use the air conditioner until a qualified service person confirms that the leakage has been repaired.
  - Do not attempt to install or repair the air conditioner yourself. Improper workmanship may result in water leakage, electric shock or fire hazards. Please contact your local dealer or qualified personnel for installation and maintenance work.
  - If the air conditioner is malfunctioning (giving off a burning odour, etc.), turn off power to the unit and contact your local dealer. Continued operation under such circumstances may result in a failure, electric shock or fire hazards.
  - Be sure to install an earth leakage circuit breaker. Failure to install an earth leakage circuit breaker may result in electric shock or fire.
- Be sure to earth the unit. Do not earth the unit to a utility pipe, lightning conductor or telephone earth lead. Imperfect earthing may result in electric shock.

<table>
<thead>
<tr>
<th>CAUTION</th>
<th>Do not use the air conditioner for purposes other than those for which it is intended. Do not use the air conditioner for cooling precision instruments, food, plants, animals or works of art as this may adversely affect the performance, quality and/or longevity of the object concerned.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Do not expose plants or animals directly to the airflow from the unit as this may cause adverse effects.</td>
</tr>
<tr>
<td></td>
<td>Do not place appliances that produce naked flames in places exposed to the airflow from the unit as this may impair combustion of the burner.</td>
</tr>
<tr>
<td></td>
<td>Do not block the air inlets nor outlets. Impaired airflow may result in insufficient performance or trouble.</td>
</tr>
</tbody>
</table>
Read Before Operation

- Do not sit on the outdoor unit, put things on the unit, or pull the unit. Doing so may cause accidents, such as falling or toppling down, thus resulting in injury, product malfunctioning, or product damage.
- Do not place objects that are susceptible to moisture directly beneath the indoor or outdoor units. Under certain conditions, condensation on the main unit or refrigerant pipes, air filter dirt or drain blockage may cause dripping, resulting in fouling or failure of the object concerned.
- After prolonged use, check the unit stand and its mounts for damage. If they are left in a damaged condition, the unit may fall and cause injury.
- To avoid injury, do not touch the air inlet or aluminium fins of the indoor or outdoor units.
- The appliance is not intended for use by unattended young children or infirm persons. Impairment of bodily functions and harm to health may result.
- Children should be supervised to ensure that they do not play with the unit or its remote controller. Accidental operation by a child may result in impairment of bodily functions and harm health.
- Avoid impacts to the indoor and outdoor units, or otherwise product damage may result.
- Do not place flammable items, such as spray cans, within 1m of the air outlet. The spray cans may explode as a result of hot air from the indoor or outdoor units.
- Be careful not to let pets urinate on the air conditioner. Urination on the air conditioner may result in electric shock or fire.
- Do not wash the air conditioner with water, as this may result in electric shock or fire.
- Do not place water containers (vases, etc.) above the unit, as this may result in electric shock or fire hazards if they should topple over.
- Do not insert the batteries in the wrong polarity (+/-) orientation as this may result in short circuiting, fire, or battery leakage.
- Do not sit or hang on the panel. The panel may fall, and injury or product malfunctioning may result.
- Do not sway the panel. The panel may hit people or objects, and injury or property damage may result.
- Do not let children play around the panel. Injury or property damage may result.
- Do not pull the wires. The wires may be broken and the panel may fall, and injury or property damage may result.
- Do not locate obstacles in the route. The panel may fall, and injury or property damage may result.
- Do not bend or damage the wires. The wires may be broken and the panel may fall, and injury or property damage may result.
- Do not put objects on the panel, or otherwise production malfunctioning may result.
- Do not use an unstable stand at the time of operating or maintaining the air conditioner, or otherwise you may topple over or injury yourself.
- Locate the remote controller in places out of reach of children. The wrong operation of the remote controller may result in injury.

To avoid oxygen depletion, ensure that the room is adequately ventilated if equipment such as a burner is used together with the air conditioner.

- Before cleaning, be sure to stop unit operation and turn off the circuit breaker. Otherwise, an electric shock and injury may result.
- Only connect the air conditioner to the specified power supply circuit. Power supplies other than the one specified may result in electric shock, overheating and fires.
- Arrange the drain hose to ensure smooth drainage. Imperfect drainage may cause wetting of the building, furniture, etc.
- Do not place objects in direct proximity of the outdoor unit and do not let leaves and other debris accumulate around the unit. Leaves are a hotbed for small animals which can enter the unit. Once inside the unit, such animals can cause malfunctions, smoke or fire if they come into contact with electrical parts.
- Do not place objects around the indoor unit.
- Doing so may have an adverse influence on the performance, product quality, and life of the air conditioner.
- This appliance is not intended to be used by persons with reduced physical, sensory or mental capabilities, or with lack of operation knowledge, unless they have been given supervision or instruction concerning the appliance use by person responsible for their safety. Keep out of children’s reach to ensure that they do not play with the appliance.

Precautions relating to area surrounding the indoor and outdoor units

- Be sure to follow the instructions below.
  - The indoor unit is at least 1m away from any television or radio set (unit may cause interference with the picture or sound).
  - Refrain from using the units in areas prone to high levels of oily smoke, such as a kitchen. Water leakage may result.

Preparation Before Operation

**CAUTION**

Incorrect handling of batteries can result in injury from battery leakage, rupturing or heating, or lead to equipment failure.

Please observe the following precautions and use safely:

- If the alkaline solution from the batteries should get in the eyes, do not rub the eyes. Instead, immediately flush the eyes with tap water and seek the attention of a medical professional.
- Keep batteries out of reach of children. In the event that batteries are swallowed, seek the immediate attention of a medical professional.
- Do not expose batteries to heat or fire. Do not disassemble or modify batteries. The insulation or gas release vent inside the battery may be damaged, resulting in battery leakage, rupturing, or heating.
- Do not damage or peel off labels on the batteries.

**To insert the batteries**

1. Slide the front cover to take it off.
2. Insert 2 dry batteries AAA.LR03 (alkaline).
3. Replace the front cover.

**To fix the remote controller holder to a wall**

1. Choose a place from where the signals reach the unit.
2. Fix the holder to a wall, a pillar, or similar location with the screws supplied with the holder.
3. Place the remote controller in the remote controller holder.

**Turn on the circuit breaker**

- After the power is turned on, the flap of the indoor unit opens and closes once to set the reference position.

**NOTE**

**Notes on batteries**

- To avoid possible injury or damage from battery leakage or rupturing, remove the batteries when not using the product for long periods of time.
- The standard replacement time is 1 year. Both batteries should be replaced at the same time. Be sure to replace them with new size AAA LR03 (alkaline) batteries.
- When battery power has run out, the LCD will begin blinking as an alert that the batteries need replacing. In some cases, when battery consumption is accelerated owing usage conditions, signal reception may decline before the LCD begins blinking.
- The batteries supplied with the remote controller are for initial operation. The batteries may run out in less than 1 year.

**Note on remote controller**

- Do not drop the remote controller. Do not get it wet.
To set the clock

1. Press \( \text{ \textbullet } \).
   
   “000” appears on the LCD.
   *MON* and “Θ” blink.

2. Press \( \text{ \textbullet } \) to set the current day of the week.

3. Press \( \text{ \textbullet } \).
   
   “Θ” blinks.

4. Press \( \text{ \textbullet } \) to set the clock to the present time.
   
   • Holding down \( \text{ \textbullet } \) or \( \text{ \textbullet } \) rapidly increases or decreases the displayed time.

5. Press \( \text{ \textbullet } \).
   
   • Point the remote controller at the indoor unit when pressing the buttons.
   
   “:” blinks.

**NOTE**

Note on setting the clock

• If the indoor unit’s internal clock is not set to the correct time, the ON/OFF TIMER and WEEKLY TIMER will not operate punctually.
The air conditioner operates with the operation mode of your choice. From the next time on, the air conditioner will operate with the same operation mode.

**To start**

1. **Press** and select an operation mode.
   - Each pressing of the button changes the mode setting in sequence.

   ![Mode Selection]

2. **Press**.
   - “ON” appears on the LCD.
   - The OPERATION lamp lights green.

**To stop**

Press **again**.
- “ON” disappears from the LCD.
- The OPERATION lamp goes off.

**To change the temperature setting**

Press **.
- Press ▲ to raise the temperature and press ▼ to lower the temperature. Each pressing of the button changes the temperature by 0.5°C.

<table>
<thead>
<tr>
<th>COOL operation</th>
<th>HEAT operation</th>
<th>AUTO operation</th>
<th>DRY or FAN operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>18.0-32.0°C</td>
<td>10.0-30.0°C</td>
<td>18.0-30.0°C</td>
<td>The temperature setting cannot be changed.</td>
</tr>
</tbody>
</table>

**NOTE**

**Notes on AUTO operation**
- In AUTO operation, the system selects an appropriate operation mode (COOL or HEAT) based on the indoor temperature and starts the operation.
- The system automatically reselects setting at a regular interval to bring the indoor temperature to the user-setting level.

**Note on DRY operation**
- Eliminates humidity while maintaining the indoor temperature as much as possible. It automatically controls temperature and airflow rate, so manual adjustment of these functions is unavailable.
**Adjusting the Airflow Rate**

You can adjust the airflow rate to increase your comfort.

### To adjust the airflow rate setting

**Press  
• Each pressing of  changes the airflow rate setting in sequence.**

- AUTO
- Indoor unit quiet
- Airflow rate 1-5 (Low to High)

- When the airflow is set to "  ", quiet operation starts and noise from the indoor unit will become quieter.
- In the quiet operation mode, the airflow rate is set to a weak level.
- In DRY operation, the airflow rate setting cannot be changed.
- If COOL/DRY operation is started with airflow settings on “AUTO”, the indoor unit will initially deodorise, which functions to suppress any internal odours. As a result, the indoor unit will not emit air immediately. (Wait for about 1 minute.)
- At smaller airflow rates, the cooling (heating) effect is also smaller.

---

**Tips for saving energy**

**Keeping the temperature setting at a moderate level helps save energy.**

- Recommended temperature setting for cooling: 26.0-28.0°C, for heating: 20.0-24.0°C

**Cover windows with a blind or a curtain.**

- Blocking sunlight and air from outdoors increases the cooling (heating) effect.

**Keep the air filters clean.**

- Clogged air filters cause inefficient operation and waste energy. Clean them once in about every 2 weeks. 

**If you are not going to use the air conditioner for a long period, for example in spring or autumn, turn off the circuit breaker.**

- The air conditioner always consumes a small amount of electricity even while it is not operating.
Basic Operation

Adjusting the Airflow Direction

You can adjust the airflow direction to increase your comfort.

⚠️ CAUTION
- Always use a remote controller to adjust the angles of the flap and louvres.
  - If you attempt to move the flap and louvres forcibly by hand when they are swinging, the mechanism may be damaged.
  - Inside the air outlet, a fan is rotating at a high speed.

■ To start auto swing

Up and down airflow direction

Press 🟪.

- “” appears on the LCD.
- The flap (horizontal blade) will begin to swing.

Right and left airflow direction

Press ✘.

- “” appears on the LCD.
- The louvres (vertical blades) will begin to swing.

The 3-D airflow direction

Press 🟪 and ✘.

- “” and “” appear on the LCD.
- The flap and louvres move in turn.
- To cancel 3-D airflow, press either 🟪 or ✘ again.
  The flap or louvres will stop moving.

■ To set the flap or louvres at the desired position

- This function is effective while the flap or louvres are in auto swing mode.

Press 🟪 and ✘ when the flap or louvres reach the desired position.

- In the 3-D airflow, the flap and louvres move in turn.
- “” or “” disappears from the LCD.

NOTE

Notes on airflow direction setting
- The movable range of the flap varies according to the operation mode.

Note on 3-D airflow
- Using 3-D airflow circulates cold air, which tends to collect at the bottom of the room, and hot air, which tends to collect near the ceiling, throughout the room, preventing areas of cold and hot developing.
COMFORT AIRFLOW Operation

The flow of air will be in the upward direction while in COOL operation and in the downward direction while in HEAT operation, which will provide a comfortable wind that will not come in direct contact with people.

![Diagram of airflow directions]

- **To start**
  - Press \[\text{Comfort}\] .
  - “(Graphics)” appears on the LCD.

<table>
<thead>
<tr>
<th></th>
<th>COOL and DRY operation</th>
<th>HEAT operation</th>
<th>FAN ONLY operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Flap direction</td>
<td>Goes up</td>
<td>Goes down</td>
<td>Not available</td>
</tr>
<tr>
<td>Airflow rate</td>
<td>AUTO</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

- **To cancel**
  - Press \[\text{Comfort}\] again.
  - “(Graphics)” disappears from the LCD.
  - The flap will return to the memory position from before COMFORT AIRFLOW operation.

**NOTE**

**Notes on COMFORT AIRFLOW Operation**
- The flap position will change, preventing air from blowing directly on the occupants of the room.
- POWERFUL operation and COMFORT AIRFLOW operation cannot be used at the same time.
- The airflow rate will be set to AUTO.
- If the upward and downward airflow direction is selected, the COMFORT AIRFLOW function will be canceled.
  
  Priority is given to the function of whichever button is pressed last.
Useful Functions

INTELLIGENT EYE Operation

The INTELLIGENT EYE sensor detects human movement and adjusts airflow direction. It can be set to avoid people or to direct airflow specifically at people. If no one is in the room for more than 20 minutes, the operation automatically changes to energy saving operation.

⚠️ CAUTION

- Do not place large objects near the INTELLIGENT EYE sensor. Also keep heating units and humidifiers outside the sensor’s detection area. This sensor can detect undesirable objects.
- Do not hit or violently push the INTELLIGENT EYE sensor. This can lead to damage and malfunction.

To start

Press \( \text{Sensor} \) and select the desired mode.

- Each time \( \text{Sensor} \) is pressed, a different setting option appears on the LCD.
- The INTELLIGENT EYE lamp lights green.

Display

- Do not blow directly on people
- Blow directly on people
- blank
- No Setting

- When the flap (horizontal blade) is swinging, selecting any of the modes above will cause the flap (horizontal blade) to stop.
- The lamp lights when human movement is detected.

To cancel

Press \( \text{Sensor} \) until no icon is displayed.

- The INTELLIGENT EYE lamp goes off.

NOTE

Note on INTELLIGENT EYE operation

- INTELLIGENT EYE operation is set to blow directly on people, the air conditioner tracks you horizontally, without the air blowing directly on you.
- When the INTELLIGENT EYE sensor detects the movement of people, it adjusts the airflow direction upward (while in COOL operation) and downward (while in HEAT operation), by adjusting the flap. Depending on the setting, the louvres (vertical blades) will either direct airflow directly toward or away from people.
How the INTELLIGENT EYE operation works

The INTELLIGENT EYE sensor detects human movement and adjusts the right and left airflow direction. If no one is in the room for more than 20 minutes, the operation automatically changes to energy saving operation. The INTELLIGENT EYE sensor works differently depending on the situation.

[Example]

<table>
<thead>
<tr>
<th>A person is detected in area 1.</th>
<th>A person is detected in area 2.</th>
<th>People are detected in both areas.</th>
<th>No people are detected in the areas.</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Image of person in area 1]</td>
<td>![Image of person in area 2]</td>
<td>![Image of people in both areas]</td>
<td>![Image of no people]</td>
</tr>
</tbody>
</table>

When the INTELLIGENT EYE operation and the COMFORT AIRFLOW operation are used together, the unit will not blow air directly at people (only in their general direction).

The airflow direction may differ from the illustrated direction depending on the actions and movements of the people in the areas.

INTELLIGENT EYE operation is useful for energy saving

Energy saving operation
- If no presence detected in the room for 20 minutes, the energy saving operation will start, and the INTELLIGENT EYE lamp goes off.
- If human movement is detected again, the INTELLIGENT EYE lamp lights up and energy saving operation terminates.
- This operation changes the temperature by −2°C in HEAT / +2°C in COOL / +2°C in DRY operation from the set temperature.
- When the room temperature exceeds 30°C, the operation changes the temperature by +1°C in COOL / +1°C in DRY operation from the set temperature.
- This operation decreases the airflow rate slightly in FAN operation only.

NOTE

Notes on INTELLIGENT EYE operation
- Application range is as follows.

<table>
<thead>
<tr>
<th>Vertical angle 90° (Side view)</th>
<th>Horizontal angle 110° (Top view)</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Image of vertical angle]</td>
<td>![Image of horizontal angle]</td>
</tr>
</tbody>
</table>

- While the air conditioner is in INTELLIGENT EYE operation, the louvres adjust the airflow direction if there are people in the sensing areas of the INTELLIGENT EYE so that the leftward or rightward airflow will not be directed to the people.
- The air conditioner switches to the energy-saving mode with the set temperature shifted by 2°C. The air conditioner may switch to the energy-saving operation even if there are people in the areas. This may occur depending on the clothes the people are wearing, if there is no movement of the people in the areas.
- The airflow direction from the louvres will be leftward if there are people in both areas 1 and 2. The air will also flow left if there is a person right in front of the sensor as the sensor judges that there are people in both areas.
- Due to the position of the sensor, people might be exposed to the airflow of the indoor unit if they are close to the front side of the indoor unit. If there are people close to the front side of the indoor unit or in both areas, it is recommended to use the COMFORT AIRFLOW and INTELLIGENT EYE operations simultaneously. Using both modes together, the air conditioner will not direct the airflow towards the people.
- The sensor could also mistakenly detect pets, sunlight, fluttering curtains and light reflected off of mirrors as passers-by.
- The sensor may not detect moving objects further than 7m away. (Please see the application range)
- Sensor detection sensitivity changes according to the indoor unit location, the speed of passers-by, temperature range, etc.
- The sensor could also mistakenly detect pets, sunlight, fluttering curtains and light reflected off of mirrors as passers-by.
- NIGHT SET mode will not switch on during use of INTELLIGENT EYE operation.
**Useful Functions**

### POWERFUL Operation

POWERFUL operation quickly maximises the cooling (heating) effect in any operation mode. In this mode, the air conditioner operates at maximum capacity.

#### To start

- Press 🌬 during operation.
  - “🌬️” appears on the LCD.
  - POWERFUL operation ends in 20 minutes. Then the system automatically operates again with the previous settings which were used before POWERFUL operation.

#### To cancel

- Press 🌬 again.
  - “🌬️” disappears from the LCD.

### NOTE

**Notes on POWERFUL operation**

- Pressing 🌬 causes the settings to be cancelled, and “🌬️” disappears from the LCD.
- POWERFUL operation will not increase the capacity of the air conditioner if the air conditioner is already in operation with its maximum capacity demonstrated.

- **In COOL, HEAT and AUTO operation**
  - To maximise the cooling (heating) effect, the capacity of outdoor unit increases and the airflow rate becomes fixed at the maximum setting.
  - The temperature and airflow settings cannot be changed.

- **In DRY operation**
  - The temperature setting is lowered by 2.5°C and the airflow rate is slightly increased.

- **In FAN operation**
  - The airflow rate is fixed at the maximum setting.

**Regarding the combination of POWERFUL and other operations**

<table>
<thead>
<tr>
<th>Combination</th>
</tr>
</thead>
<tbody>
<tr>
<td>POWERFUL + COMFORT AIRFLOW</td>
</tr>
<tr>
<td>POWERFUL + ECONO</td>
</tr>
<tr>
<td>POWERFUL + OUTDOOR UNIT QUIET</td>
</tr>
</tbody>
</table>

*Priority is given to the function of whichever button is pressed last.
**ECONO / OUTDOOR UNIT QUIET Operation**

ECONO operation enables efficient operation by limiting the maximum power consumption. This function is useful to prevent the circuit breaker from tripping when the unit operates alongside other appliances on the same circuit.

OUTDOOR UNIT QUIET operation lowers the noise level of the outdoor unit by changing the frequency and fan speed of the outdoor unit. This function is convenient during the night-time operation.

### To start

![Remote Control with icons](image)

- **Press** and select the desired mode.
  - Each time is pressed, a different setting option appears on the LCD.

### To cancel

- **Press** until no icon is displayed.

---

**NOTE**

**Notes on ECONO operation**

- This operation is performed with lower power and therefore may not provide a sufficient cooling (heating) effect.
- Pressing causes the settings to be cancelled, and " " disappears from the LCD.
- If the power consumption level is already low, switching to ECONO operation will not reduce the power consumption.

**Notes on OUTDOOR UNIT QUIET operation**

- Even if the operation is stopped by using the remote controller or the indoor unit ON/OFF switch when using OUTDOOR UNIT QUIET operation, " " will remain displayed on the remote controller.
- OUTDOOR UNIT QUIET operation will not reduce the frequency nor fan speed if they already are operating at reduced levels.
- This operation is performed with lower power and therefore may not provide a sufficient cooling (heating) effect.

**Possible combinations of ECONO / OUTDOOR UNIT QUIET operation and basic operations**

<table>
<thead>
<tr>
<th>Operation mode</th>
<th>DRY</th>
<th>COOL</th>
<th>HEAT</th>
<th>FAN</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECONO</td>

</tbody>
</table>
ON/OFF TIMER Operation

Timer functions are useful for automatically switching the air conditioner on or off at night or in the morning. You can also use the ON TIMER and OFF TIMER together.

[ON TIMER with a 24 hour clock display]
(24 HOUR ON/OFF TIMER)

■ To set

- Check that the clock is correct.
  If not, set the clock to the present time. ➔Page 10

1. Press On.
   “6:00” appears on the LCD.
   “ON” blinks.
   • “Mon” and day of the week disappear from the LCD.

2. Press until the time setting reaches the point you like.
   • Each pressing of either button increases or decreases the time setting by 10 minutes.
   Holding down either button changes the setting rapidly.

3. Press On again.
   • “ON” and setting time appear on the LCD.
   • The TIMER lamp lights orange.

■ To cancel

Press Cancel.
   • “ON” and setting time disappear from the LCD.
   • “Mon” and day of the week appear on the LCD.
   • The TIMER lamp goes off.

NOTE

Notes on TIMER operation
- When TIMER is set, the present time is not displayed.
- When using the ON/OFF TIMER to start/stop operation, the actual operation start/stop time may differ from the time set.
  (Maximum of about 10 minutes)

In the following cases, set the timer again.
- After the circuit breaker has turned off.
- After a power failure.
- After replacing the batteries in the remote controller.
[OFF TIMER with a 24 hour clock display]
(24 HOUR ON/OFF TIMER)

To set

• Check that the clock is correct. If not, set the clock to the present time.

1. Press Off.

   “Off: 00:00” appears on the LCD. “Off” blinks.

   • “ ” and day of the week disappear from the LCD.

2. Press until the time setting reaches the point you like.

   • Each pressing of either button increases or decreases the time setting by 10 minutes. Holding down either button changes the time setting rapidly.

3. Press again.

   • “Off” and setting time appear on the LCD.
   • The TIMER lamp lights orange.

To cancel

Press Cancel.

• “Off” and setting time disappear from the LCD.
• “ ” and day of the week appear on the LCD.
• The TIMER lamp goes off.

[ON/OFF TIMER combination]

To combine

• A sample setting for combining the 2 timers is shown below.

(Example)

 Present time: 23:00 (The unit is operating)
 OFF TIMER at 0:00
 ON TIMER at 14:00
 Combined

NOTE

NIGHT SET mode

• When the OFF TIMER is set, the air conditioner automatically adjusts the temperature setting (0.5°C up in COOL, 2.0°C down in HEAT) to prevent excessive cooling (heating) during sleeping hours.
[ON/OFF TIMER with an hours remaining display] (COUNT UP-DOWN ON/OFF TIMER)

• Check that the clock is correct. If not, set the clock to the present time. ➤ Page 10

1. Press and hold On or Off for about 5 seconds, when signal indicator (▲) blink, release your finger from the button.

   • For ON TIMER  “Onhr” appears on the LCD.
   • For OFF TIMER  “Offhr” appears on the LCD.

2. Press until the time setting reaches the point you like.
   • Each pressing of the button increases or decreases the time setting by 1 hour.
   • The time can be set between 1 and 12 hours.

3. Press On or Off again.
   • “On” and “Off”, and setting time appear on the LCD.
   • The TIMER lamp lights orange.
   • To change the display mode from COUNT UP-DOWN ON/OFF TIMER to 24 HOUR ON/OFF TIMER, repeat STEP 1, and continue from STEP 2 of “24 HOUR ON/OFF TIMER”. ➤ Page 19, 20

   • Timer display mode cannot be changed while “On” or “Off” are blinking.

   Press On or Off to stop the blinking.

■ Combining display modes

• Different display modes (24 HOUR ON/OFF TIMER and COUNT UP-DOWN ON/OFF TIMER) can be used for the ON TIMER and OFF TIMER simultaneously.

(Example) Present time: 22:00 [unit is in operating]
OFF TIMER at 1:00 (3 hours after present time) ON TIMER at 6:00 (8 hours after present time)
Combined

OFF 3hr
On 6:00
OFF 110hr
On 8:00
OFF 3hr

NOTE

Notes on COUNT UP-DOWN ON/OFF TIMER
• After setting, the time displayed on the LCD will automatically count down by 1 hour for every 1 hour that passes.
For example, if the OFF TIMER is set to 3 hours, the display will change as follows: 3hr → 2hr → 1hr → blank (OFF)

Switching between ON/OFF TIMER display modes (24 hour clock and hours remaining display)
• When changing timer display modes (from 24 HOUR ON/OFF TIMER to COUNT UP-DOWN ON/OFF TIMER or vice versa), the timer cancels. The timer must be set again to activate it.
WEEKLY TIMER Operation

Up to 4 timer settings can be saved for each day of the week. This is convenient to adapt the WEEKLY TIMER to your family’s life style.

Setting example of the WEEKLY TIMER

The same timer settings are used from Monday through Friday, while different timer settings are used for the weekend.

- Up to 4 reservations per day and 28 reservations per week can be set using the WEEKLY TIMER. The effective use of the copy mode simplifies timer programming.
- The use of ON-ON-ON-ON settings, for example, makes it possible to schedule operating mode and set temperature changes. Furthermore, by using OFF-OFF-OFF-OFF settings, only the turn off time of each day can be set. This will turn off the air conditioner automatically if you forget to turn it off.
WEEKLY TIMER Operation

To use WEEKLY TIMER operation

Setting mode

- Make sure the day of the week and time are set.
  If not, set the day of the week and time.  [Page 10]

Setting Displays

Day and number  ON/OFF  Time  Temperature

1. Press .
   - The day of the week and the reservation number of the current day will be displayed.
   - 1 to 4 settings can be made per day.

2. Press to select the desired day of the week and reservation number.
   - Pressing changes the reservation number and the day of the week.

3. Press .
   - The day of the week and reservation number will be set.
   - "WEEKLY" and "ON" blink.

4. Press to select the desired mode.
   - Pressing changes the "ON" or "OFF" setting in sequence.
   - In case the reservation has already been set, selecting "blank" deletes the reservation.
   - Proceed to STEP 9 if "blank" is selected.
   - To return to the day of the week and reservation number setting, press .

5. Press .
   - The ON/OFF TIMER mode will be set.
   - "WEEKLY" and the time blink.
6. Press  to select the desired time.
- The time can be set between 0:00 and 23:50 in 10-minute intervals.
- To return to the ON/OFF TIMER mode setting, press .
- Proceed to STEP 9 when setting the OFF TIMER.

7. Press .
- The time will be set.
- *COOL* and the temperature blink.

8. Press  to select the desired temperature.
- The temperature can be set between 10.0°C and 32.0°C.
  COOL or AUTO: The unit operates at 18.0°C even if it is set to 10.0°C to 17.0°C.
  HEAT or AUTO: The unit operates at 30.0°C even if it is set to 31.0°C to 32.0°C.
- To return to the time setting, press .
- The set temperature is only displayed when the mode setting is on.

- The temperature will be set and go to the next reservation setting.
- The temperature is set while in ON TIMER operation, and the time is set while in OFF TIMER operation.
- The next reservation screen will appear.
- To continue further settings, repeat the procedure from STEP 4.

10. Press  to complete the setting.
- Be sure to direct the remote controller toward the indoor unit and check for a receiving tone and blinking of the OPERATION lamp.
- *COOL* appears on the LCD and WEEKLY TIMER operation is activated.
- The TIMER lamp lights orange.

Display
- A reservation made once can be easily copied and the same settings used for another day of the week. Refer to Copy mode .

NOTE

Notes on WEEKLY TIMER operation
- Do not forget to set the clock on the remote controller first. 
- The day of the week, ON/OFF TIMER mode, time and set temperature (only for ON TIMER mode) can be set with the WEEKLY TIMER. Other settings for the ON TIMER are based on the settings just before the operation.
- WEEKLY TIMER and ON/OFF TIMER operation cannot be used at the same time. The ON/OFF TIMER operation has priority if it is set while WEEKLY TIMER is still active. The WEEKLY TIMER will enter the standby state, and *COOL* will disappear from the LCD. When the ON/OFF TIMER is up, the WEEKLY TIMER will automatically become active.
- Only the time and set temperature with the WEEKLY TIMER are sent with the . Set the WEEKLY TIMER only after setting the operation mode, the airflow rate and the airflow direction ahead of time.
- Turning off the circuit breaker, power failure, and other similar events will render operation of the indoor unit’s internal clock inaccurate. Reset the clock.
- *COOL* can be used only for the time and temperature settings. It cannot be used to go back to the reservation number.
**WEEKLY TIMER Operation**

**Copy mode**
- A reservation made once can be copied to another day of the week. The whole reservation of the selected day of the week will be copied.

1. Press ⬤.
2. Press to confirm the day of the week to be copied.
3. Press ⬤.
   - The whole reservation of the selected day of the week will be copied.
4. Press to select the destination day of the week.
5. Press ⬤.
   - The reservation will be copied to the selected day of the week. The whole reservation of the selected day of the week will be copied.
   - To continue copying the settings to other days of the week, repeat STEP 4 and STEP 5.
6. Press ⬤ to complete the setting.
   - “ ” appears on the LCD and WEEKLY TIMER operation is activated.

**NOTE**

Note on COPY MODE
- The entire reservation of the source day of the week is copied in the copy mode.
- In the case of making a reservation change for any day of the week individually after copying the content of weekly reservations, press and change the settings in the steps of Setting mode ➔ Page 23.
CONFIRMING A RESERVATION

- The reservation can be confirmed.

### Setting Displays

1. **Press**
   - The day of the week and the reservation number of the current day will be displayed.

2. **Press**
   - To select the day of the week and the reservation number to be confirmed.
   - Pressing displays the reservation details.
   - To change the confirmed reserved settings, select the reservation number and press .
   - The mode is switched to setting mode. Proceed to Setting mode STEP 4. Page 23

3. **Press**
   - “WEEKLY” appears on the LCD and WEEKLY TIMER operation is activated.
   - The TIMER lamp lights orange.

### To deactivate WEEKLY TIMER operation

- **Press** while “WEEKLY” is displayed on the LCD.
  - “WEEKLY” disappears from the LCD.
  - The TIMER lamp goes off.
  - To reactivate the WEEKLY TIMER operation, press again.
  - If a reservation deactivated with is activated once again, the last reservation mode will be used.

### NOTE

- If not all the reservation settings are reflected, deactivate the WEEKLY TIMER operation once. Then press again to reactivate the WEEKLY TIMER operation.
WEEKLY TIMER Operation

To delete a reservation

**An individual reservation**

1. **Press** .  
   - The day of the week and the reservation number will be displayed.

2. **Press** to select the day of the week and the reservation number to be deleted.

3. **Press** .  
   - "" and "ON" or "OFF" blink.

4. **Press** until no icon is displayed.  
   - Pressing changes the ON/OFF TIMER mode in sequence.
   - Selecting “blank” will cancel any reservation you may have.

5. **Press** .  
   - The selected reservation will be deleted.

6. **Press** .  
   - If there are still other reservations, WEEKLY TIMER operation will be activated.

**Reservations for each day of the week**

- This function can be used for deleting reservations for each day of the week.
- It can be used while confirming or setting reservations.

1. **Press** .  
   - The day of the week and the reservation number will be displayed.

2. **Press** to select the day of the week to be deleted.

3. **Hold** for about 5 seconds.  
   - The reservation of the selected day of the week will be deleted.

4. **Press** .  
   - If there are still other reservations, WEEKLY TIMER operation will be activated.

**All reservations**

- **Hold** for about 5 seconds with the normal display.
  - Be sure to direct the remote controller toward the indoor unit and check for a receiving tone.
  - This operation cannot be used for the WEEKLY TIMER setting display.
  - All reservations will be deleted.
Care and Cleaning

CAUTION

• Before cleaning, be sure to stop the operation and turn off the circuit breaker.
• Do not touch the aluminum fins of the indoor unit. If you touch those parts, this may cause an injury.

Quick reference

Cleaning parts

Front panel
• Wipe it with a soft damp cloth.
• Only neutral detergent may be used.

Air filter
• Vacuum dust or wash the filter.

Indoor unit, outdoor unit and remote controller
• Wipe them with a soft cloth.

If dirty

Titanium apatite deodorizing filter (included with the air conditioner) and dust collection filter (PM2.5) (sold separately)

To purchase, contact the dealer where you bought the air conditioner.

</table>

Titanium apatite deodorizing filter
• Vacuum dust or replace the filter.

[Cleaning] [Replacement]

Once every 6 months Once every 3 years

Dust collection filter (PM2.5)
• No cleaning is required. Please replace the filter every 6 months.

Notes on cleaning

For cleaning, do not use any of the following:
• Water hotter than 40°C
• Volatile liquid such as benzene, petrol and thinner
• Polishing compounds
• Rough materials such as a scrubbing brush
Care and Cleaning

**Air filter**

1. Open the front panel.
   - Hold the front panel by the sides and open it.

2. Pull out the air filters.
   - Push the filter tab at the centre of each air filter a little upwards, then pull it down.

3. Wash the air filters with water or clean them with vacuum cleaner.
   - It is recommended to clean the air filters every 2 weeks.

If the dust does not come off easily
   - Wash the air filters with neutral detergent thinned with lukewarm water, then dry them up in the shade.

4. Reattach the filters.

5. Close the front panel slowly.
   - Press the panel at both sides and the centre.

   - Make sure that the front panel is securely fixed.
Titanium apatite deodorizing filter (included with the air conditioner) / dust collection filter (PM2.5) (sold separately)

**Attaching**

1. Open the front panel and pull out the air filters. [Page 29]

2. Insert the titanium apatite deodorizing filters or dust collection filters (PM2.5).
   - Check that the filters are inserted securely under the tabs.

**Cleaning and Replacement**

1. Open the front panel and pull out the air filters. [Page 29]

2. Take off the titanium apatite deodorizing filters or dust collection filters (PM2.5).
   - Remove the filters from the tabs.

3. Clean or replace the titanium apatite deodorizing filters or dust collection filters (PM2.5)

   [Cleaning for titanium apatite deodorizing filter (Blue-Black)]
   3-1 Vacuum dust, and soak in lukewarm water or water for about 10 to 15 minutes if very dirty.
   3-2 After washing, shake off remaining water and let them dry in the shade.
   - This filter can be renewed by washing it with water once every 6 months and we recommend replacing it once every 3 years.
   - Do not wiring out the filter when removing water from it.

   [Cleaning for dust collection filter (PM2.5) (White)]
   - Do not wash the filters as this will reduce their efficiency.
   - It is recommended to replace it once every 6 months.

[Replacement]

Remove each filter from the front grille by detaching them from the 6 tabs and then install the new filters.

- When attaching the filter, check that the filter is properly set in the tabs.

4. Set the filters as they were and close the front panel.
   - Press the front panel at both sides and the center.

**NOTE**

- Operation with dirty filters:
  - cannot deodorise the air,
  - cannot clean the air,
  - results in poor cooling,
  - may cause odour.
- Dispose of old filters as non-flammable waste.
Care and Cleaning

Prior to a long period of non-use

1. Operate the FAN mode for several hours on a fine day to dry out the inside.
   1) Press [MODE] and select “FAN”.
   2) Press [ ] and start the operation.

2. After operation stops, turn off the circuit breaker for the room air conditioner.

3. Clean the air filters and reattach them. ➤ Page 29

4. To prevent battery leakage, take out the batteries from the remote controller.

We recommend periodical maintenance

- In certain operating conditions, the inside of the air conditioner may get foul after several seasons of use, resulting in poor performance. It is recommended to have periodical maintenance by a specialist in addition to regular cleaning by the user.
- For specialist maintenance, please contact the dealer where you bought the air conditioner.
- The maintenance cost must be borne by the user.
FAQ

Indoor unit

The flap does not start swinging immediately.
  • The air conditioner is adjusting the position of the flap. The flap will start moving soon.

The air conditioner stops generating airflow during HEAT operation.
  • Once the set temperature is reached, the airflow rate is reduced and operation stopped in order to avoid generating a cool airflow. Operation will resume automatically when the indoor temperature falls.

HEAT operation stops suddenly and a flowing sound is heard.
  • The outdoor unit is defrosting. HEAT operation starts after the frost on the outdoor unit has been removed. This can take about 4 to 12 minutes.

Operation does not start soon.
  • When was pressed soon after operation was stopped.
  • When the mode was reselected.
    • This is to protect the air conditioner. You should wait for about 3 minutes.

Outdoor unit

The outdoor unit emits water or steam.
  • In HEAT operation
    • The frost on the outdoor unit melts into water or steam when the air conditioner is in defrosting operation.
  • In COOL or DRY operation
    • Moisture in the air condenses into water on the cool surface of the outdoor unit piping and drips.

Different sounds are heard.
  • A sound like flowing water
    • This sound is generated because the refrigerant in the air conditioner is flowing.
    • This is a pumping sound of the water in the air conditioner and can be heard when the water is pumped out from the air conditioner during COOL or DRY operation.
  • Blowing sound
    • This sound is generated when the flow of the refrigerant in the air conditioner is switched over.
  • Ticking sound
    • This sound is generated when the cabinet and frame of the air conditioner slightly expand or shrink as a result of temperature changes.
  • Whistling sound
    • This sound is generated when refrigerant flows during defrosting operation.
  • Clicking sound during operation or idle time
    • This sound is generated when the refrigerant control valves or the electrical parts operate.
  • Clopping sound
    • This sound is heard from the inside of the air conditioner when the exhaust fan is activated while the room doors are closed. Open the window or turn off the exhaust fan.

* The appearance of the outdoor unit may differ from some models.
When the Need Arises

Troubleshooting

Before making an inquiry or a request for repair, please check the following. If the problem persists, consult your dealer.

Not a problem

<th>Case</th>
<th>Description / what to check</th>
</tr>
</thead>
<tbody>
<tr>
<td>The air conditioner suddenly starts behaving strangely during operation.</td>
<td>• The air conditioner may malfunction due to lightning or radio. If the air conditioner malfunctions, turn off the power with the circuit breaker and restart the operation with the remote controller.</td>
</tr>
<tr>
<td>The ON/OFF TIMER does not operate according to the settings.</td>
<td>• Check if the ON/OFF TIMER and the WEEKLY TIMER are set to the same time. Change or deactivate the settings in the WEEKLY TIMER. Page 22</td>
</tr>
</tbody>
</table>

NOTE

Notes on the operating conditions

• If operation continues under any conditions other than those listed in the table,
  – A safety device may activate to stop the operation.
  – Dew may form on the indoor unit and drip from it when COOL or DRY operation is selected.

<table>
<thead>
<tr>

| HEAT       | Outdoor temperature: -15.0-24.0°C  
Indoor temperature: 10.0-30.0°C |
When the Need Arises

Troubleshooting

■ Call your dealer immediately

⚠️ WARNING

When an abnormality (such as a burning smell) occurs, stop operation and turn off the circuit breaker.

• Continued operation in an abnormal condition may result in problems, electric shock or fire.
• Consult the dealer where you bought the air conditioner.

Do not attempt to repair or modify the air conditioner by yourself.

• Incorrect work may result in electric shock or fire.
• Consult the dealer where you bought the air conditioner.

If one of the following symptoms takes place, call your dealer immediately.

- The power cord is abnormally hot or damaged.
- An abnormal sound is heard during operation.
- The circuit breaker, a fuse, or the earth leakage circuit breaker cuts off the operation frequently.
- A switch or a button often fails to work properly.
- There is a burning smell.
- Water leaks from the indoor unit.

Turn off the circuit breaker and call your dealer.

■ After a power failure

- The air conditioner automatically resumes operation in about 3 minutes. Please wait for a while.

■ Lightning

- If there is a risk lightning could strike in the neighbourhood, stop operation and turn off the circuit breaker to protect the system.

■ Disposal requirements

- Dismantling of the unit, handling of the refrigerant, oil and other parts, should be done in accordance with the relevant local and national regulations.
Fault diagnosis by remote controller

- In case the air conditioner is malfunctioning, you can check the error code via the remote controller before consulting with service personnel and informing them of the malfunction code.

1. When \( \text{[Cancel]} \) is held down for about 5 seconds, “\( \text{00} \)” blinks in the temperature display section.

2. Press \( \text{[Cancel]} \) repeatedly until a long beep is produced.

- The code indication changes as shown below, and notifies you with a long beep.

NOTE

- A short beep indicates non-corresponding codes.
- To cancel the code display, hold \( \text{[Cancel]} \) down for about 5 seconds. The code display also clears if no button is pressed for 1 minute.
Quick Reference
Features

Enhanced comfort and energy savings

INTELLIGENT EYE
The INTELLIGENT EYE sensor detects human movement in a room. If no one is in the room for more than 20 minutes, the operation automatically changes to energy saving operation. ➤Page 15

WEEKLY TIMER
Up to 4 timer settings can be saved for each day of the week according to your family's life style. The WEEKLY TIMER allows you to set on/off times and the desired temperature. ➤Page 22

Other functions

COMFORT AIRFLOW
The airflow direction is upward while in COOL operation, and downward while in HEAT operation. This function prevents cold or warm air from blowing directly on your body. ➤Page 14

OUTDOOR UNIT QUIET
OUTDOOR UNIT QUIET operation assures a low noise level of the outdoor unit. This function is useful to maintain a quiet neighbourhood. ➤Page 18

ECONO
This function enables efficient operation by limiting the maximum power consumption. It is useful when using the air conditioner and other electrical devices simultaneously on a shared electrical circuit. Page 18
Read Before Operation

Safety Precautions

Read the precautions in this manual carefully before operating the unit.

This appliance is filled with R32.

- Keep this manual where the user can easily find it.
- The precautions described herein are classified as WARNING and CAUTION. They both contain important information regarding safety. Be sure to observe all precautions without fail.

**WARNING**
Failure to follow these instructions properly may result in personal injury or loss of life.

**CAUTION**
Failure to observe these instructions properly may result in property damage or personal injury, which may be serious depending on the circumstances.

Never attempt. Be sure to follow the instructions. Be sure to establish an earth connection.

- After reading, keep this manual in a convenient place so that you can refer to it whenever necessary. If the equipment is transferred to a new user, be sure also to hand over the manual.

**WARNING**
- Do not use means to accelerate the defrosting process or to clean, other than those recommended by the manufacturer.
- The appliance must be stored in a room without continuously operating ignition sources (for example: open flames, an operating gas appliance or an operating electric heater).
- Do not pierce or burn.
- Be aware that refrigerants may not contain an odour.
- The appliance must be installed, operated and stored in a room with floor area larger than 3.5m² for 50/60 class, 3.9m² for 71 class. Maintain an installation height of 1.8m or more from the floor surface to the bottom of the appliance. If the size of the room where the appliance is to be installed has less than the indicated minimum floor area, install it in a well ventilated room.
- For details refer to the WARNING list in the "Safety Precautions" section of the installation manual for the outdoor unit.
- To avoid fire, explosion or injury, do not operate the unit when harmful gases (e.g. flammable or corrosive) are detected near the unit.
- Be aware that prolonged, direct exposure to cool or warm air from the air conditioner, or to air that is too cool or too warm, can be harmful to your physical condition and health.
- Do not place objects, including rods, your fingers, etc., in the air inlet or outlet. Product damage or personal injury may result due to contact with the air conditioner’s high-speed fan blades.
- Do not attempt to repair, dismantle, reinstall or modify the air conditioner yourself as this may result in water leakage, electric shock or fire hazards.
- Do not use flammable spray near the air conditioner, or otherwise fire may result.
- Do not use a refrigerant other than the one indicated on the outdoor unit (R32) when installing, moving or repairing. Using other refrigerants may cause trouble or damage to the unit, and personal injury.
- To avoid electric shock, do not operate with wet hands.

**CAUTION**
- Beware of fire in case of refrigerant leakage. If the air conditioner is not operating correctly, i.e. not generating cool or warm air, refrigerant leakage could be the cause. Consult your dealer for assistance. The refrigerant within the air conditioner is safe and normally does not leak. However, in the event of a leakage, contact with a naked burner, heater or cooker may result in generation of noxious gas. Do not use the air conditioner until a qualified service person confirms that the leakage has been repaired.
- Do not attempt to install or repair the air conditioner yourself. Improper workmanship may result in water leakage, electric shock or fire hazards. Please contact your local dealer or qualified personnel for installation and maintenance work.
- If the air conditioner is malfunctioning (giving off a burning odour, etc.), turn off power to the unit and contact your local dealer. Continued operation under such circumstances may result in a failure, electric shock or fire hazards.
- Be sure to install an earth leakage circuit breaker. Failure to install an earth leakage circuit breaker may result in electric shock or fire.
- Be sure to earth the unit. Do not earth the unit to a utility pipe, lightning conductor or telephone earth lead. Imperfect earthing may result in electric shock.

- Do not use the air conditioner for purposes other than those for which it is intended. Do not use the air conditioner for cooling precision instruments, food, plants, animals or works of art as this may adversely affect the performance, quality and/or longevity of the object concerned.
- Do not expose plants or animals directly to the airflow from the unit as this may cause adverse effects.
- Do not place appliances that produce naked flames in places exposed to the airflow from the unit as this may impair combustion of the burner.
- Do not block the air inlets or outlets. Impaired airflow may result in insufficient performance or trouble.
Read Before Operation

- Do not sit on the outdoor unit, put things on the unit, or pull the unit. Doing so may cause accidents, such as falling or toppling down, thus resulting in injury, product malfunctioning, or product damage.
- Do not place objects that are susceptible to moisture directly beneath the indoor or outdoor units. Under certain conditions, condensation on the main unit or refrigerant pipes, air filter dirt or drain blockage may cause dripping, resulting in fouling or failure of the object concerned.
- After prolonged use, check the unit stand and its mounts for damage. If they are left in a damaged condition, the unit may fall and cause injury.
- To avoid injury, do not touch the air inlet or aluminium fins of the indoor or outdoor units.
- The appliance is not intended for use by unattended young children or infirm persons. Impairment of bodily functions and harm to health may result.
- Children should be supervised to ensure that they do not play with the unit or its remote controller. Accidental operation by a child may result in impairment of bodily functions and harm health.
- Avoid impacts to the indoor and outdoor units, or otherwise product damage may result.
- Do not place flammable items, such as spray cans, within 1m of the air outlet. The spray cans may explode as a result of hot air from the indoor or outdoor units.
- Be careful not to let pets urinate on the air conditioner. Urination on the air conditioner may result in electric shock or fire.
- Do not wash the air conditioner with water, as this may result in electric shock or fire.
- Do not place water containers (vases, etc.) above the unit, as this may result in electric shock or fire hazards if they should topple over.
- Do not insert the batteries in the wrong polarity (+/-) orientation as this may result in short circuiting, fire, or battery leakage.
- Do not sit or hang on the panel. The panel may fall, and injury or product malfunctioning may result.
- Do not sway the panel. The panel may hit people or objects, and injury or property damage may result.
- Do not let children play around the panel. Injury or property damage may result.
- Do not pull the wires. The wires may be broken and the panel may fall, and injury or property damage may result.
- Do not locate obstacles in the route. The panel may fall, and injury or property damage may result.
- Do not bend or damage the wires. The wires may be broken and the panel may fall, and injury or property damage may result.
- Do not put objects on the panel, or otherwise production malfunctioning may result.
- Do not use an unstable stand at the time of operating or maintaining the air conditioner, or otherwise you may topple over or injury yourself.
- Locate the remote controller in places out of reach of children. The wrong operation of the remote controller may result in injury.

To avoid oxygen depletion, ensure that the room is adequately ventilated if equipment such as a burner is used together with the air conditioner.

- Before cleaning, be sure to stop unit operation and turn off the circuit breaker. Otherwise, an electric shock and injury may result.
- Only connect the air conditioner to the specified power supply circuit. Power supplies other than the one specified may result in electric shock, overheating and fires.
- Arrange the drain hose to ensure smooth drainage. Imperfect drainage may cause wetting of the building, furniture, etc.
- Do not place objects in direct proximity of the outdoor unit and do not let leaves and other debris accumulate around the unit. Leaves are a hotbed for small animals which can enter the unit. Once inside the unit, such animals can cause malfunctions, smoke or fire if they come into contact with electrical parts.
- Do not place objects around the indoor unit.
- Doing so may have an adverse influence on the performance, product quality, and life of the air conditioner.
- This appliance is not intended to be used by persons with reduced physical, sensory or mental capabilities, or with lack of operation knowledge, unless they have been given supervision or instruction concerning the appliance use by person responsible for their safety. Keep out of children’s reach to ensure that they do not play with the appliance.

Precautions relating to area surrounding the indoor and outdoor units

- Be sure to follow the instructions below:
  - The indoor unit is at least 1m away from any television or radio set (unit may cause interference with the picture or sound).
  - Refrain from using the units in areas prone to high levels of oily smoke, such as a kitchen. Water leakage may result.
Names of Parts

Indoor Unit

- Front panel
- Air inlet
- Flaps (horizontal blades)
- Louvres (vertical blades)
  - The louvres are inside of the air outlet.
- Air outlet
- Model name
- Room temperature sensor
  - Detects the air temperature around the unit.
- Display
  - Signal receiver
    - Receives signals from the remote controller.
    - When the unit receives a signal, you will hear a beep sound.
  - OPERATION lamp (green)
  - TIMER lamp (orange)
  - INTELLIGENT EYE lamp (green)

Indoor unit ON/OFF switch
- Press this switch once to start operation.
- Press once again to stop it.
- For the operation mode setting, refer to the following table.

Preparation Before Operation

⚠️ CAUTION

Incorrect handling of batteries can result in injury from battery leakage, rupturing or heating, or lead to equipment failure.

Please observe the following precautions and use safely.

- If the alkaline solution from the batteries should get in the eyes, do not rub the eyes. Instead, immediately flush the eyes with tap water and seek the attention of a medical professional.
- Keep batteries out of reach of children. In the event that batteries are swallowed, seek the immediate attention of a medical professional.
- Do not expose batteries to heat or fire. Do not disassemble or modify batteries. The insulation or gas release vent inside the battery may be damaged, resulting in battery leakage, rupturing, or heating.
- Do not damage or peel off labels on the batteries.

- To insert the batteries
  1. Slide the front cover to take it off.
  2. Insert 2 dry batteries AAA.LR03 (alkaline).
  3. Replace the front cover.

- To fix the remote controller holder to a wall
  1. Choose a place from where the signals reach the unit.
  2. Fix the holder to a wall, a pillar, or similar location with the screws supplied with the holder.
  3. Place the remote controller in the remote controller holder.

- Turn on the circuit breaker
  - After the power is turned on, the flaps of the indoor unit open and close once to set the reference position.

NOTE

Notes on batteries
- To avoid possible injury or damage from battery leakage or rupturing, remove the batteries when not using the product for long periods of time.
- The standard replacement time is 1 year. Both batteries should be replaced at the same time. Be sure to replace them with new size AAA. LR03 (alkaline) batteries.
- When battery power has run out, the LCD will begin blinking as an alert that the batteries need replacing. In some cases, when battery consumption is accelerated owing usage conditions, signal reception may decline before the LCD begins blinking.
- The batteries supplied with the remote controller are for initial operation. The batteries may run out in less than 1 year.

Note on remote controller
- Do not drop the remote controller. Do not get it wet.
To set the clock

1. Press .
   “000” appears on the LCD.
   “MON” and “Ø” blink.

2. Press to set the current day of the week.

3. Press .
   “Ø” blinks.

4. Press to set the clock to the present time.
   • Holding down ▲ or ▼ rapidly increases or decreases the displayed time.

5. Press .
   • Point the remote controller at the indoor unit when pressing the buttons.
   “;” blinks.

NOTE

Note on setting the clock
• If the indoor unit’s internal clock is not set to the correct time, the ON/OFF TIMER and WEEKLY TIMER will not operate punctually.
Basic Operation

AUTO · DRY · COOL · HEAT · FAN
Operation

The air conditioner operates with the operation mode of your choice. From the next time on, the air conditioner will operate with the same operation mode.

■ To start

1. Press \( \text{Mode} \) and select an operation mode.
   - Each pressing of the button changes the mode setting in sequence.
   - AUTO \( \rightarrow \) DRY \( \rightarrow \) COOL \( \rightarrow \) HEAT \( \rightarrow \) FAN

2. Press \( \text{Start} \).
   - \( \ast \) \( \text{ON} \) \( \ast \) appears on the LCD.
   - The OPERATION lamp lights green.

■ To stop

Press \( \text{Start} \) again.
   - \( \ast \) \( \text{ON} \) \( \ast \) disappears from the LCD.
   - The OPERATION lamp goes off.

■ To change the temperature setting

Press \( \text{Temp} \).
   - Press \( \uparrow \) to raise the temperature and press \( \downarrow \) to lower the temperature. Each pressing of the button changes the temperature by 0.5°C.

<table>
<thead>
<tr>
<th>COOL operation</th>
<th>HEAT operation</th>
<th>AUTO operation</th>
<th>DRY or FAN operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>18.0 - 32.0°C</td>
<td>10.0 - 30.0°C</td>
<td>18.0 - 30.0°C</td>
<td>The temperature setting cannot be changed.</td>
</tr>
</tbody>
</table>

NOTE

Notes on AUTO operation
- In AUTO operation, the system selects an appropriate operation mode (COOL or HEAT) based on the indoor temperature and starts the operation.
- The system automatically reselects setting at a regular interval to bring the indoor temperature to the user-setting level.

Note on DRY operation
- Eliminates humidity while maintaining the indoor temperature as much as possible. It automatically controls temperature and airflow rate, so manual adjustment of these functions is unavailable.
Adjusting the Airflow Rate

You can adjust the airflow rate to increase your comfort.

To adjust the airflow rate setting

Press \( \text{Fan} \).

- Each pressing of \( \text{Fan} \) changes the airflow rate setting in sequence.

- When the airflow is set to “\( \text{AUTO} \)”, quiet operation starts and noise from the indoor unit will become quieter.
- In the quiet operation mode, the airflow rate is set to a weak level.
- In DRY operation, the airflow rate setting cannot be changed.
- If COOL/DRY operation is started with airflow settings on “AUTO”, the indoor unit will initially deodorise, which functions to suppress any internal odours. As a result, the indoor unit will not emit air immediately. (Wait for about 1 minute.)
- At smaller airflow rates, the cooling (heating) effect is also smaller.

Tips for saving energy

Keeping the temperature setting at a moderate level helps save energy.

- Recommended temperature setting for cooling: 26.0 - 28.0°C, heating: 20.0 - 24.0°C

Cover windows with a blind or a curtain.

- Blocking sunlight and air from outdoors increases the cooling (heating) effect.

Keep the air filters clean.

- Clogged air filters cause inefficient operation and waste energy. Clean them once in about every 2 weeks.  

If you are not going to use the air conditioner for a long period, for example in spring or autumn, turn off the circuit breaker.

- The air conditioner always consumes a small amount of electricity even while it is not operating.
Basic Operation

Adjusting the Airflow Direction

You can adjust the airflow direction to increase your comfort.

⚠️ CAUTION

- Always use a remote controller to adjust the angles of the flaps and louvres.
- If you attempt to move the flaps and louvres forcibly by hand when they are swinging, the mechanism may be damaged.
- Inside the air outlet, a fan is rotating at a high speed.

To start auto swing

Up and down airflow direction

Press 🔄.

- “��” appears on the LCD.
- The flaps (horizontal blades) will begin to swing.

Right and left airflow direction

Press 🔄.

- “��” appears on the LCD.
- The louvres (vertical blades) will begin to swing.

The 3-D airflow direction

Press 🔄 and 🔄.

- “��” and “��” appear on the LCD.
- The flaps and louvres move in turn.
- To cancel 3-D airflow, press either 🔄 or 🔄 again.
  The flaps or louvres will stop moving.

To set the flaps or louvres at the desired position

- This function is effective while the flaps or louvres are in auto swing mode.

Press 🔄 and 🔄 when the flaps or louvres reach the desired position.

- In the 3-D airflow, the flaps and louvres move in turn.
- “��” or “ апр” disappears from the LCD.

NOTE

Notes on airflow direction setting
- The movable range of the flaps varies according to the operation mode.

Note on 3-D airflow
- Using 3-D airflow circulates cold air, which tends to collect at the bottom of the room, and hot air, which tends to collect near the ceiling, throughout the room, preventing areas of cold and hot developing.
COMFORT AIRFLOW Operation

The flow of air will be in the upward direction while in COOL operation and in the downward direction while in HEAT operation, which will provide a comfortable wind that will not come in direct contact with people.

To start

Press Comfort.

- “ ” appears on the LCD.

To cancel

Press Comfort again.

- “ ” disappears from the LCD.
- The flaps will return to the memory position form before COMFORT AIRFLOW operation.

NOTE

Notes on COMFORT AIRFLOW Operation

- The flaps position will change, preventing air from blowing directly on the occupants of the room.
- POWERFUL operation and COMFORT AIRFLOW operation cannot be used at the same time.
- The airflow rate will be set to AUTO.
- If the upward and downward airflow direction is selected, the COMFORT AIRFLOW function will be canceled. Priority is given to the function of whichever button is pressed last.
Useful Functions

**INTELLIGENT EYE Operation**

The INTELLIGENT EYE operation detects human movement. If no one is detected in the room for more than 20 minutes, the unit automatically enters energy saving operation.

⚠️ **CAUTION**

- Do not place large objects near the INTELLIGENT EYE sensor. Also keep heating units and humidifiers outside the sensor’s detection area. This sensor can detect undesirable objects.
- Do not hit or violently push the INTELLIGENT EYE sensor. This can lead to damage and malfunction.

### To start

- **Press** \( \text{Sensor} \) and select the desired model.
  - Each time “\( \text{Sensor} \)” is pressed, a different setting option is displayed on the LCD.
  - The INTELLIGENT EYE lamp lights green.

  ![Display Diagram]

  - The lamp lights when human movement is detected.

### To cancel

- **Press** \( \text{Sensor} \) button.
  - The INTELLIGENT EYE lamp goes off.
INTELLIGENT EYE operation is useful for energy saving

- People are detected in the sensing area.
- No people are detected in the sensing area.

The air conditioner is in normal operation while the sensor is detecting human movement.
The air conditioner will switch to energy-saving mode after 20 minutes.

Energy saving operation
- If no presence detected in the room for 20 minutes, the energy saving operation will start, and the INTELLIGENT EYE lamp goes off.
- If human movement is detected again, the INTELLIGENT EYE lamp lights up and energy saving operation terminates.
- This operation changes the temperature by -2°C in HEAT / +2°C in COOL / +2°C in DRY operation from the set temperature.
- When the room temperature exceeds 30°C, the operation changes the temperature by +1°C in COOL / +1°C in DRY operation from the set temperature.
- This operation decreases the airflow rate slightly in FAN operation only.

NOTE

Notes on INTELLIGENT EYE operation
- Application range is as follows.

- The sensor may not detect moving objects further than 7m away. (Please see the application range)
- Sensor detection sensitivity changes according to the indoor unit location, the speed of passers-by, temperature range, etc.
- The sensor could also mistakenly detect pets, sunlight, fluttering curtains and light reflected off of mirrors as passers-by.
- NIGHT SET mode on Page 20 will not switch on during use of INTELLIGENT EYE operation.

Note on combination of COMFORT AIRFLOW operation and INTELLIGENT EYE operation
- The airflow rate will be set to AUTO. If the up and down airflow direction is selected, COMFORT AIRFLOW operation will be cancelled.
  Priority is given to the function of whichever button is pressed last.
**Useful Functions**

**POWERFUL Operation**

POWERFUL operation quickly maximises the cooling (heating) effect in any operation mode. In this mode, the air conditioner operates at maximum capacity.

**To start**

- Press during operation.
  - “” appears on the LCD.
  - POWERFUL operation ends in 20 minutes. Then the system automatically operates again with the previous settings which were used before POWERFUL operation.

**To cancel**

- Press again.
  - “” disappears from the LCD.

**NOTE**

**Notes on POWERFUL operation**

- Pressing causes the settings to be cancelled, and “” disappears from the LCD.
- POWERFUL operation will not increase the capacity of the air conditioner if the air conditioner is already in operation with its maximum capacity demonstrated.
  - In COOL, HEAT and AUTO operation
    - To maximise the cooling (heating) effect, the capacity of outdoor unit increases and the airflow rate becomes fixed at the maximum setting.
    - The temperature and airflow settings cannot be changed.
  - In DRY operation
    - The temperature setting is lowered by 2.5°C and the airflow rate is slightly increased.
  - In FAN operation
    - The airflow rate is fixed at the maximum setting.

**Regarding the combination of POWERFUL and other operations**

<table>
<thead>
<tr>
<th>Combination</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>POWERFUL + COMFORT AIRFLOW</td>
<td>Not available*</td>
</tr>
<tr>
<td>POWERFUL + ECONO</td>
<td></td>
</tr>
<tr>
<td>POWERFUL + OUTDOOR UNIT QUIET</td>
<td></td>
</tr>
</tbody>
</table>

*Priority is given to the function of whichever button is pressed last.*
ECONO / OUTDOOR UNIT QUIET Operation

ECONO operation enables efficient operation by limiting the maximum power consumption. This function is useful to prevent the circuit breaker from tripping when the unit operates alongside other appliances on the same circuit.

OUTDOOR UNIT QUIET operation lowers the noise level of the outdoor unit by changing the frequency and fan speed of the outdoor unit. This function is convenient during the night-time operation.

To start

Press \( \text{ECONO QUIET} \) and select the desired mode.

- Each time \( \text{ECONO QUIET} \) is pressed, a different setting option appears on the LCD.

To cancel

Press \( \text{ECONO QUIET} \) until no icon is displayed.

NOTE

Notes on ECONO operation
- This operation is performed with lower power and therefore may not provide a sufficient cooling (heating) effect.
- Pressing \( \text{ECONO QUIET} \) causes the settings to be cancelled, and \( \text{ECONO QUIET} \) disappears from the LCD.
- If the power consumption level is already low, switching to ECONO operation will not reduce the power consumption.

Notes on OUTDOOR UNIT QUIET operation
- Even if the operation is stopped by using the remote controller or the indoor unit ON/OFF switch when using OUTDOOR UNIT QUIET operation, \( \text{ECONO QUIET} \) will remain displayed on the remote controller.
- OUTDOOR UNIT QUIET operation will not reduce the frequency nor fan speed if they already are operating at reduced levels.
- This operation is performed with lower power and therefore may not provide a sufficient cooling (heating) effect.

Possible combinations of ECONO / OUTDOOR UNIT QUIET operation and basic operations

ON/OFF TIMER Operation

Timer functions are useful for automatically switching the air conditioner on or off at night or in the morning. You can also use the ON TIMER and OFF TIMER together.

[ON TIMER with a 24 hour clock display]
(24 HOUR ON/OFF TIMER)

To set

- Check that the clock is correct.
  If not, set the clock to the present time.  ➤ Page 10

1. Press [On].

- "6:00" appears on the LCD.
- "ON" blinks.
- "Θ" and day of the week disappear from the LCD.

2. Press [ ] until the time setting reaches the point you like.

- Each pressing of either button increases or decreases the time setting by 10 minutes.
  Holding down either button changes the setting rapidly.

- "ON" and setting time appear on the LCD.
- The TIMER lamp lights orange.

To cancel

Press [Cancel].

- "ON" and setting time disappear from the LCD.
- "Θ" and day of the week appear on the LCD.
- The TIMER lamp goes off.

NOTE

Notes on TIMER operation
- When TIMER is set, the present time is not displayed.
- When using the ON/OFF TIMER to start/stop operation, the actual operation start/stop time may differ from the time set.
  (Maximum of about 10 minutes)

In the following cases, set the timer again.
- After the circuit breaker has turned off.
- After a power failure.
- After replacing the batteries in the remote controller.
[OFF TIMER with a 24 hour clock display]
(24 HOUR ON/OFF TIMER)

■ To set
- Check that the clock is correct.
  If not, set the clock to the present time. ►Page 10

1. Press \(\text{off} \) .

- “0:00” appears on the LCD.
  - “off” blinks.
  - “on” and day of the week disappear from the LCD.

2. Press \(\text{up} \) until the time setting reaches the point you like.
- Each pressing of either button increases or decreases the time setting by 10 minutes.
  Holding down either button changes the time setting rapidly.

3. Press \(\text{off} \) again.
- “on” and setting time appear on the LCD.
  - The TIMER lamp lights orange.

■ To cancel
- Press \(\text{cancel} \) .
  - “off” and setting time disappear from the LCD.
  - “on” and day of the week appear on the LCD.
  - The TIMER lamp goes off.

[ON/OFF TIMER combination]

■ To combine
- A sample setting for combining the 2 timers is shown below.

   (Example)
   - Present time: 23:00 (The unit is operating)
   - OFF TIMER at 0:00
   - ON TIMER at 14:00
   - Combined

   \(\text{off} \ 0:00 \ \text{on} \ 14:00 \)

NOTE

NIGHT SET mode
- When the OFF TIMER is set, the air conditioner automatically adjusts the temperature setting (0.5°C up in COOL, 2.0°C down in HEAT) to prevent excessive cooling (heating) during sleeping hours.
ON/OFF TIMER Operation

[ON/OFF TIMER with an hours remaining display]
(COUNT UP-DOWN ON/OFF TIMER)

- Check that the clock is correct. If not, set the clock to the present time. ►Page 10

1. Press and hold [On] or [Off] for about 5 seconds, when signal indicator (▲) blink, release your finger from the button.

For ON TIMER
“hr” appears on the LCD.
“On” blinks.

For OFF TIMER
“hr” appears on the LCD
“Off” blinks.

- “O” and day of the week disappear from the LCD.

2. Press [▲] until the time setting reaches the point you like.

- Each pressing of the button increases or decreases the time setting by 1 hour.
- The time can be set between 1 and 12 hours.

- “On” and “Off”, and setting time appear on the LCD.
- The TIMER lamp lights orange.
- To change the display mode from COUNT UP-DOWN ON/OFF TIMER to 24 HOUR ON/OFF TIMER, repeat STEP 1, and continue from STEP 2 of “24 HOUR ON/OFF TIMER”.

- Timer display mode cannot be changed while “On” or “Off” are blinking.

Press [▲] or [▼] to stop the blinking.

Combining display modes

- Different display modes (24 HOUR ON/OFF TIMER and COUNT UP-DOWN ON/OFF TIMER) can be used for the ON TIMER and OFF TIMER simultaneously.

Example)
Present time: 22:00 [unit is in operation]
OFF TIMER at 1:00 (3 hours after present time)
ON TIMER at 6:00 (8 hours after present time)

Combined

NOTE

Notes on COUNT UP-DOWN ON/OFF TIMER

- After setting, the time displayed on the LCD will automatically count down by 1 hour for every 1 hour that passes.

Switching between ON/OFF TIMER display modes (24 hour clock and hours remaining display)

- When changing timer display modes (from 24 HOUR ON/OFF TIMER to COUNT UP-DOWN ON/OFF TIMER or vice versa), the timer cancels. The timer must be set again to activate it.
WEEKLY TIMER Operation

Up to 4 timer settings can be saved for each day of the week. This is convenient to adapt the WEEKLY TIMER to your family’s life style.

### Setting example of the WEEKLY TIMER

The same timer settings are used from Monday through Friday, while different timer settings are used for the weekend.

<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Programme 1</td>
<td>Programme 2</td>
</tr>
<tr>

</tbody>
</table>

- Up to 4 reservations per day and 28 reservations per week can be set using the WEEKLY TIMER. The effective use of the copy mode simplifies timer programming.
- The use of ON-ON-ON-ON settings, for example, makes it possible to schedule operating mode and set temperature changes. Furthermore, by using OFF-OFF-OFF-OFF settings, only the turn off time of each day can be set. This will turn off the air conditioner automatically if you forget to turn it off.
WEEKLY TIMER Operation

To use WEEKLY TIMER operation

Setting mode

- Make sure the day of the week and time are set.
  - If not, set the day of the week and time. (Page 10)

[Monday]

Setting Displays

Day and number | ON/OFF | Time | Temperature
---------------|-------|------|---------------
MON            |       | 6:00 | 25.0°C

1. Press .
   - The day of the week and the reservation number of the current day will be displayed.
   - 1 to 4 settings can be made per day.

2. Press to select the desired day of the week and reservation number.
   - Pressing changes the reservation number and the day of the week.

3. Press .
   - The day of the week and reservation number will be set.
   - "ON WEEKLY" and "ON" blink.

4. Press to select the desired mode.
   - Pressing changes the "ON" or "OFF" setting in sequence.

In case the reservation has already been set, selecting "blank" deletes the reservation.
Proceed to STEP 9 if "blank" is selected.
To return to the day of the week and reservation number setting, press .

5. Press .
   - The ON/OFF TIMER mode will be set.
   - "ON WEEKLY" and the time blink.
6. Press \( \rightarrow \) to select the desired time.
- The time can be set between 0:00 and 23:59 in 10-minute intervals.
- To return to the ON/OFF TIMER mode setting, press \( \text{Back} \).
- Proceed to STEP 9 when setting the OFF TIMER.

7. Press \( \uparrow \).
- The time will be set.
- ‘CANCEL’ and the temperature blink.

8. Press \( \rightarrow \) to select the desired temperature.
- The temperature can be set between 10.0°C and 32.0°C.
- COOL or AUTO: The unit operates at 18.0°C even if it is set to 10.0°C to 17.0°C.
- HEAT or AUTO: The unit operates at 30.0°C even if it is set to 31.0°C to 32.0°C.
- To return to the time setting, press \( \text{Back} \).
- The set temperature is only displayed when the mode setting is on.

9. Press \( \uparrow \).
- The temperature will be set and go to the next reservation setting.
- The temperature is set while in ON TIMER operation, and the time is set while in OFF TIMER operation.
- The next reservation screen will appear.
- To continue further settings, repeat the procedure from STEP 4.

10. Press \( \text{Set} \) to complete the setting.
- Be sure to direct the remote controller toward the indoor unit and check for a receiving tone and blinking of the OPERATION lamp.
- ‘O WEEKLY’ appears on the LCD and WEEKLY TIMER operation is activated.
- The TIMER lamp lights orange.

**NOTE**

**Notes on WEEKLY TIMER operation**
- Do not forget to set the clock on the remote controller first. \( \text{Page 10} \)
- The day of the week, ON/OFF TIMER mode, time and set temperature (only for ON TIMER mode) can be set with the WEEKLY TIMER.
- Other settings for the ON TIMER are based on the settings just before the operation.
- WEEKLY TIMER and ON/OFF TIMER operation cannot be used at the same time. The ON/OFF TIMER operation has priority if it is set while WEEKLY TIMER is still active. The WEEKLY TIMER will enter the standby state, and ‘O WEEKLY’ will disappear from the LCD. When the ON/OFF TIMER is up, the WEEKLY TIMER will automatically become active.
- Only the time and set temperature with the WEEKLY TIMER are sent with the \( \text{Set} \). Set the WEEKLY TIMER only after setting the operation mode, the airflow rate and the airflow direction ahead of time.
- Turning off the circuit breaker, power failure, and other similar events will render operation of the indoor unit’s internal clock inaccurate. Reset the clock. \( \text{Page 10} \)
- \( \text{Set} \) can be used only for the time and temperature settings. It cannot be used to go back to the reservation number.
WEEKLY TIMER Operation

Copy mode
- A reservation made once can be copied to another day of the week. The whole reservation of the selected day of the week will be copied.

<table>
<thead>
<tr>

</table>

[Monday]

[6:00] 25.0°C [8:30] [17:30] 27.0°C [22:00] COPY
[Tuesday] to [Friday]

[6:00] 25.0°C [8:30] [17:30] 27.0°C [22:00]

Setting Displays

1. Press [ ].
2. Press [ ] to confirm the day of the week to be copied.
3. Press [ ].
   - The whole reservation of the selected day of the week will be copied.
4. Press [ ] to select the destination day of the week.
5. Press [ ].
   - The reservation will be copied to the selected day of the week. The whole reservation of the selected day of the week will be copied.
   - To continue copying the settings to other days of the week, repeat STEP 4 and STEP 5.
6. Press [ ] to complete the setting.
   - A WEEKLY appears on the LCD and WEEKLY TIMER operation is activated.

NOTE

Note on COPY MODE
- The entire reservation of the source day of the week is copied in the copy mode.
- In the case of making a reservation change for any day of the week individually after copying the content of weekly reservations, press [ ] and change the settings in the steps of Setting mode Page 23.
Confirming a reservation

- The reservation can be confirmed.

1. Press .
   - The day of the week and the reservation number of the current day will be displayed.

2. Press to select the day of the week and the reservation number to be confirmed.
   - Pressing displays the reservation details.
   - To change the confirmed reserved settings, select the reservation number and press . The mode is switched to setting mode. Proceed to Setting mode STEP 4. Page 23.

3. Press to exit the confirmation mode.
   - " appears on the LCD and WEEKLY TIMER operation is activated.
   - The TIMER lamp lights orange.

To deactivate WEEKLY TIMER operation

Press Weekly while " WEEKLY " is displayed on the LCD.

- * WEEKLY * disappears from the LCD.
- The TIMER lamp goes off.
- To reactivate the WEEKLY TIMER operation, press Weekly again.
- If a reservation deactivated with Weekly is activated once again, the last reservation mode will be used.

NOTE

- If not all the reservation settings are reflected, deactivate the WEEKLY TIMER operation once. Then press Weekly again to reactivate the WEEKLY TIMER operation.
WEEKLY TIMER Operation

To delete a reservation

An individual reservation

1. Press .
   - The day of the week and the reservation number will be displayed.

2. Press Weekly to select the day of the week and the reservation number to be deleted.

3. Press Next .
   - “ON WEEKLY” and “ON” or “OFF” blink.

4. Press until no icon is displayed.
   - Pressing changes the ON/OFF TIMER mode in sequence.
   - Selecting “blank” will cancel any reservation you may have.

5. Press Next .
   - The selected reservation will be deleted.

6. Press .
   - If there are still other reservations, WEEKLY TIMER operation will be activated.

Reservations for each day of the week

- This function can be used for deleting reservations for each day of the week.
- It can be used while confirming or setting reservations.

1. Press .
   - The day of the week and the reservation number will be displayed.

2. Press Weekly to select the day of the week to be deleted.

3. Hold Weekly for about 5 seconds.
   - The reservation of the selected day of the week will be deleted.

4. Press .
   - If there are still other reservations, WEEKLY TIMER operation will be activated.

All reservations

Hold Weekly for about 5 seconds with the normal display.

- Be sure to direct the remote controller toward the indoor unit and check for a receiving tone.
- This operation cannot be used for the WEEKLY TIMER setting display.
- All reservations will be deleted.
Care and Cleaning

**CAUTION**

- Before cleaning, be sure to stop the operation and turn off the circuit breaker.
- Do not touch the aluminum fins of the indoor unit. If you touch those parts, this may cause an injury.

### Quick reference

#### Cleaning parts

- **Front panel**
  - Wipe it with a soft damp cloth.
  - Only neutral detergent may be used.
  - If dirty

- **Air filter**
  - Vacuum dust or wash the filter.
  - Once every 2 weeks

- **Indoor unit, outdoor unit and remote controller**
  - Wipe them with a soft cloth.
  - If dirty

#### Titanium apatite deodorizing filter (included with the air conditioner) and dust collection filter (PM2.5) (sold separately)

To purchase, contact the dealer where you bought the air conditioner.

<table>
<thead>
<tr>
<th>Item</th>
<th>Part No.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Titanium apatite deodorizing filter - without frame (set of 2)</td>
<td>KAF970A46</td>
</tr>
<tr>
<td>Dust collection filter (PM2.5) - without frame (set of 2)</td>
<td>BAFP046A41</td>
</tr>
</tbody>
</table>

- **Titanium apatite deodorizing filter**
  - Vacuum dust or replace the filter.
  - [Cleaning] Once every 6 months
  - [Replacement] Once every 3 years

- **Dust collection filter (PM2.5)**
  - No cleaning is required. Please replace the filter every 6 months.

### Notes on cleaning

For cleaning, do not use any of the following:

- Water hotter than 40°C
- Volatile liquid such as benzene, petrol and thinner
- Polishing compounds
- Rough materials such as a scrubbing brush
Care and Cleaning

- **Air filter**

1. **Open the front panel.**
   - Hold the front panel by the sides and open it.

2. **Pull out the air filters.**
   - Push the filter tab at the centre of each air filter a little upwards, then pull it down.

3. **Wash the air filters with water or clean them with vacuum cleaner.**
   - It is recommended to clean the air filters every 2 weeks.

4. **Reattach the filters.**

5. **Close the front panel slowly.**
   - Press the panel at both sides and the centre.
   - Make sure that the front panel is securely fixed.

If the dust does not come off easily

- Wash the air filters with neutral detergent thinned with lukewarm water, then dry them up in the shade.
Titanium apatite deodorizing filter (included with the air conditioner) / dust collection filter (PM2.5) (sold separately)

Attaching

1. Open the front panel and pull out the air filters.  
2. Insert the titanium apatite deodorizing filters or dust collection filters (PM2.5).
   • Check that the filters are inserted securely under the tabs.

Cleaning and Replacement

1. Open the front panel and pull out the air filters.  
2. Take off the titanium apatite deodorizing filters or dust collection filters (PM2.5).
   • Hold the recessed parts of the frame and unhook the 4 claws.
   • Remove the filters from the tabs.

3. Clean or replace the titanium apatite deodorizing filters or dust collection filters (PM2.5).

   [Cleaning for titanium apatite deodorizing filter (Blue-Black)]
   3-1 Vacuum dust, and soak in lukewarm water or water for about 10 to 15 minutes if very dirty.
   3-2 After washing, shake off remaining water and let them dry in the shade.
      • This filter can be renewed by washing it with water once every 6 months and we recommend replacing it once every 3 years.
      • Do not wiring out the filter when removing water from it.

   [Cleaning for dust collection filter (PM2.5) (White)]
   • Do not wash the filters as this will reduce their efficiency.
   • It is recommended to replace it once every 6 months.

[Replacement]

   Remove the filter from the filter frame and prepare a new one.
   • Do not throw away the filter frame. Reuse the filter frame when replacing titanium apatite deodorizing filter or dust collection filter (PM2.5).
   • When attaching the filter, check that the filter is properly set in the tabs.

4. Set the filters as they were and close the front panel.
   • Press the front panel at both sides and the center.

NOTE

• Operation with dirty filters:
  – cannot deodorise the air,
  – cannot clean the air,
  – results in poor cooling,
  – may cause odour.
• Dispose of old filters as non-flammable waste.
Care and Cleaning

Prior to a long period of non-use

1. Operate the FAN mode for several hours on a fine day to dry out the inside.
   1) Press and select “.”
   2) Press and start the operation.

2. After operation stops, turn off the circuit breaker for the room air conditioner.

3. Clean the air filters and reattach them. [Page 20]

4. To prevent battery leakage, take out the batteries from the remote controller.

We recommend periodical maintenance

- In certain operating conditions, the inside of the air conditioner may get foul after several seasons of use, resulting in poor performance. It is recommended to have periodical maintenance by a specialist in addition to regular cleaning by the user.
- For specialist maintenance, please contact the dealer where you bought the air conditioner.
- The maintenance cost must be borne by the user.
FAQ

Indoor unit

The flaps do not start swinging immediately.

- The air conditioner is adjusting the position of the flaps. The flaps will start moving soon.

The air conditioner stops generating airflow during HEAT operation.

- Once the set temperature is reached, the airflow rate is reduced and operation stopped in order to avoid generating a cool airflow. Operation will resume automatically when the indoor temperature falls.

HEAT operation stops suddenly and a flowing sound is heard.

- The outdoor unit is defrosting. HEAT operation starts after the frost on the outdoor unit has been removed. This can take about 4 to 12 minutes.

Operation does not start soon.

- When 🔄 was pressed soon after operation was stopped.
- When the mode was reselected.
  - This is to protect the air conditioner. You should wait for about 3 minutes.

Different sounds are heard.

- A sound like flowing water
  - This sound is generated because the refrigerant in the air conditioner is flowing.
  - This is a pumping sound of the water in the air conditioner and can be heard when the water is pumped out from the air conditioner during COOL or DRY operation.

- Blowing sound
  - This sound is generated when the flow of the refrigerant in the air conditioner is switched over.

- Ticking sound
  - This sound is generated when the cabinet and frame of the air conditioner slightly expand or shrink as a result of temperature changes.

- Whistling sound
  - This sound is generated when refrigerant flows during defrosting operation.

- Clicking sound during operation or idle time
  - This sound is generated when the refrigerant control valves or the electrical parts operate.

- Clopping sound
  - This sound is heard from the inside of the air conditioner when the exhaust fan is activated while the room doors are closed. Open the window or turn off the exhaust fan.

Outdoor unit

The outdoor unit emits water or steam.

- In HEAT operation
  - The frost on the outdoor unit melts into water or steam when the air conditioner is in defrosting operation.

- In COOL or DRY operation
  - Moisture in the air condenses into water on the cool surface of the outdoor unit piping and drips.
Troubleshooting

When the Need Arises

Before making an inquiry or a request for repair, please check the following.
If the problem persists, consult your dealer.

Not a problem
This case is not a problem.

Check
Please check again before requesting repairs.

The air conditioner does not operate

When the Need Arises

Troubleshooting

■ Call your dealer immediately

⚠️ WARNING

When an abnormality (such as a burning smell) occurs, stop operation and turn off the circuit breaker.
- Continued operation in an abnormal condition may result in problems, electric shock or fire.
- Consult the dealer where you bought the air conditioner.

Do not attempt to repair or modify the air conditioner by yourself.
- Incorrect work may result in electric shock or fire.
- Consult the dealer where you bought the air conditioner.

If one of the following symptoms takes place, call your dealer immediately.

- The power cord is abnormally hot or damaged.
- An abnormal sound is heard during operation.
- The circuit breaker, a fuse, or the earth leakage circuit breaker cuts off the operation frequently.
- A switch or a button often fails to work properly.
- There is a burning smell.
- Water leaks from the indoor unit.

Turn off the circuit breaker and call your dealer.

■ After a power failure

- The air conditioner automatically resumes operation in about 3 minutes. Please wait for a while.

■ Lightning

- If there is a risk lightning could strike in the neighbourhood, stop operation and turn off the circuit breaker to protect the system.

■ Disposal requirements

- Dismantling of the unit, handling of the refrigerant, oil and other parts, should be done in accordance with the relevant local and national regulations.
**Fault diagnosis by remote controller**

- In case the air conditioner is malfunctioning, you can check the error code via the remote controller before consulting with service personnel and informing them of the malfunction code.

1. **When** is held down for about 5 seconds, “**00**” blinks in the temperature display section.

2. **Press** repeatedly until a long beep is produced.
   - The code indication changes as shown below, and notifies you with a long beep.

**NOTE**

- A short beep indicate non-corresponding codes.
- To cancel the code display, hold **Cancel** down for about 5 seconds. The code display also clears if no button is pressed for 1 minute.
The two-dimensional bar code is a manufacturing code.
Features

Enhanced comfort and energy savings

INTELLIGENT EYE
The INTELLIGENT EYE sensor detects human movement in a room. If no one is in the room for more than 20 minutes, the operation automatically changes to energy saving operation. ►Page 14

WEEKLY TIMER
Up to 4 timer settings can be saved for each day of the week according to your family's lifestyle. The WEEKLY TIMER allows you to set on/off times and the desired temperature. ►Page 20

Other functions

COMFORT AIRFLOW
The airflow direction is upward while in COOL operation, and downward while in HEAT operation. This function prevents cold or warm air from blowing directly on your body. ►Page 14

OUTDOOR UNIT QUIET
OUTDOOR UNIT QUIET operation assures a low noise level of the outdoor unit. This function is useful to maintain a quiet neighbourhood. ►Page 17

Troubleshooting........................................31
Safety Precautions

Read the precautions in this manual carefully before operating the unit.

This appliance is filled with R32.

- Keep this manual where the user can easily find it.
- The precautions described herein are classified as WARNING and CAUTION. They both contain important information regarding safety. Be sure to observe all precautions without fail.

**WARNING**
- Failure to follow these instructions properly may result in personal injury or loss of life.

**CAUTION**
- Failure to observe these instructions properly may result in property damage or personal injury, which may be serious depending on the circumstances.

- Never attempt.
- Be sure to follow the instructions.
- Be sure to establish an earth connection.

- After reading, keep this manual in a convenient place so that you can refer to it whenever necessary. If the equipment is transferred to a new user, be sure also to hand over the manual.

**WARNING**
- Do not use means to accelerate the defrosting process or to clean, other than those recommended by the manufacturer.
- The appliance must be stored in a room without continuously operating ignition sources (for example: open flames, an operating gas appliance or an operating electric heater).
- Do not pierce or burn.
- Be aware that refrigerants may not contain an odour.
- The appliance must be installed, operated and stored in a room with floor area larger than 5.5m² for FTKM85/95, 6.7m² for FTXM85, 8.7m² for FTXM95. Maintain an installation height of 1.8m or more from the floor surface to the bottom of the appliance. If the size of the room where the appliance is to be installed has less than the indicated minimum floor area, install it in a well ventilated room. For details refer to the WARNING list in the “Safety Precautions” section of the installation manual for the outdoor unit.
- To avoid fire, explosion or injury, do not operate the unit when harmful gases (e.g. flammable or corrosive) are detected near the unit.
- Be aware that prolonged, direct exposure to cool or warm air from the air conditioner, or to air that is too cool or too warm, can be harmful to your physical condition and health.
- Do not place objects, including rods, your fingers, etc., in the air inlet or outlet. Product damage or personal injury may result due to contact with the air conditioner’s high-speed fan blades.
- Do not attempt to repair, dismantle, reinstall or modify the air conditioner yourself as this may result in water leakage, electric shock or fire hazards.
- Do not use flammable spray near the air conditioner, or otherwise fire may result.
- Do not use a refrigerator other than the one indicated on the outdoor unit (R32) when installing, moving or repairing. Using other refrigerants may cause trouble or damage to the unit, and personal injury.
- To avoid electric shock, do not operate with wet hands.

**CAUTION**
- Beware of fire in case of refrigerant leakage. If the air conditioner is not operating correctly, i.e. not generating cool or warm air, refrigerant leakage could be the cause. Consult your dealer for assistance. The refrigerant within the air conditioner is safe and normally does not leak. However, in the event of a leakage, contact with a naked burner, heater or cooker may result in generation of noxious gas. Do not use the air conditioner until a qualified service person confirms that the leakage has been repaired.
- Do not attempt to install or repair the air conditioner yourself. Improper workmanship may result in water leakage, electric shock or fire hazards. Please contact your local dealer or qualified personnel for installation and maintenance work.
- If the air conditioner is malfunctioning (giving off a burning odour, etc.), turn off power to the unit and contact your local dealer. Continued operation under such circumstances may result in a failure, electric shock or fire hazards.
- Be sure to install an earth leakage circuit breaker. Failure to install an earth leakage circuit breaker may result in electric shock or fire.

- Be sure to earth the unit. Do not earth the unit to a utility pipe, lightning conductor or telephone earth lead. Imperfect earthing may result in electric shock.

**CAUTION**
- Do not use the air conditioner for purposes other than those for which it is intended. Do not use the air conditioner for cooling precision instruments, food, plants, animals or works of art as this may adversely affect the performance, quality and/or longevity of the object concerned.
- Do not expose plants or animals directly to the airflow from the unit as this may cause adverse effects.
- Do not place appliances that produce naked flames in places exposed to the airflow from the unit as this may impair combustion of the burner.
- Do not block the air inlets nor outlets. Impaired airflow may result in insufficient performance or trouble.
• Do not sit on the outdoor unit, put things on the unit, or pull the unit. Doing so may cause accidents, such as falling or toppling down, thus resulting in injury, product malfunctioning, or product damage.
• Do not place objects that are susceptible to moisture directly beneath the indoor or outdoor units. Under certain conditions, condensation on the main unit or refrigerant pipes, air filter dirt or drain blockage may cause dripping, resulting in fouling or failure of the object concerned.
• After prolonged use, check the unit stand and its mounts for damage. If they are left in a damaged condition, the unit may fail and cause injury.
• To avoid injury, do not touch the air inlet or aluminium fins of the indoor or outdoor units.
• The appliance is not intended for use by unattended young children or infirm persons. Impairment of bodily functions and harm to health may result.
• Children should be supervised to ensure that they do not play with the unit or its remote controller. Accidental operation by a child may result in impairment of bodily functions and harm health.
• Avoid impacts to the indoor and outdoor units, or otherwise product damage may result.
• Do not place flammable items, such as spray cans, within 1 m of the air outlet. The spray cans may explode as a result of hot air from the indoor or outdoor units.
• Be careful not to let pets urinate on the air conditioner. Urination on the air conditioner may result in electric shock or fire.
• Do not wash the air conditioner with water, as this may result in electric shock or fire.
• Do not place water containers (vases, etc.) above the unit, as this may result in electric shock or fire hazards if they should topple over.
• Do not insert the batteries in the wrong polarity (+/-) orientation as this may result in short circuiting, fire, or battery leakage.
• Do not sit or hang on the panel. The panel may fall, and injury or product malfunctioning may result.
• Do not sway the panel. The panel may hit people or objects, and injury or property damage may result.
• Do not let children play around the panel. Injury or property damage may result.
• Do not pull the wires. The wires may be broken and the panel may fall, and injury or property damage may result.
• Do not locate obstacles in the route. The panel may fall, and injury or property damage may result.
• Do not bend or damage the wires. The wires may be broken and the panel may fall, and injury or property damage may result.
• Do not put objects on the panel, or otherwise production malfunctioning may result.
• Do not use an unstable stand at the time of operating or maintaining the air conditioner, or otherwise you may topple over or injury yourself.
• Locate the remote controller in places out of reach of children. The wrong operation of the remote controller may result in injury.

• To avoid oxygen depletion, ensure that the room is adequately ventilated if equipment such as a burner is used together with the air conditioner.
• Before cleaning, be sure to stop unit operation and turn off the circuit breaker. Otherwise, an electric shock and injury may result.
• Only connect the air conditioner to the specified power supply circuit. Power supplies other than the one specified may result in electric shock, overheating and fires.
• Arrange the drain hose to ensure smooth drainage. Imperfect drainage may cause wetting of the building, furniture, etc.
• Do not place objects in direct proximity of the outdoor unit and do not let leaves and other debris accumulate around the unit. Leaves are a hotbed for small animals which can enter the unit. Once inside the unit, such animals can cause malfunctions, smoke or fire if they come into contact with electrical parts.
• Do not place objects around the indoor unit.
• This appliance is not intended to be used by persons with reduced physical, sensory or mental capabilities, or with lack of operation knowledge, unless they have been given supervision or instruction concerning the appliance use by person responsible for their safety. Keep out of children's reach to ensure that they do not play with the appliance.

Precautions relating to area surrounding the indoor and outdoor units

- Be sure to follow the instructions below.
  - The indoor unit is at least 1 m away from any television or radio set (unit may cause interference with the picture or sound).
  - Refrain from using the units in areas prone to high levels of oily smoke, such as a kitchen. Water leakage may result.
Names of Parts

**Indoor Unit**

- **Front panel**
- **Air inlet**

</tbody>
</table>
- This switch can be used when the remote controller is missing.
Open the front panel

Outdoor Unit

- Air filter
- Titanium apatite deodorizing filter (Blue-Black)
- Air inlet (back and side)
- Earth terminal (inside)
- Refrigerant pipes and inter-unit wire
- Drain hose
- Air outlet
Names of Parts

Remote Controller

Signal transmitter
- To use the remote controller, aim the transmitter at the indoor unit. If there is anything blocking the signals between the unit and the remote controller, such as a curtain, the unit may not operate.
- The maximum transmission distance is about 7m.

Display (LCD)
- Displays the current settings. (In this illustration, each section is shown with all its displays on for the purpose of explanation.) (Explained by ARC466A16)
- For ARC466A14, the display is as follows:

FAN setting button
- Selects the airflow rate setting. [Page 12]

POWERFUL button
- POWERFUL operation. [Page 16]

TEMPERATURE adjustment button
- Changes the temperature setting. [Page 11]

ON/OFF button
- Press this button once to start operation. Press once again to stop it. [Page 11]

Front cover
- Open the front cover. [Page 8]

For FTXM85/95 ARC466A16
For FTKM85/95 ARC466A14
Open the front cover

**MODE selector button**
- Selects the operation mode.
  (AUTO/DRY/COOL/HEAT/FAN)

**ECONO/QUIET button**
- ECONO/OUTDOOR UNIT QUIET operation.

**SWING button**
- Adjusts the airflow direction.

**OFF TIMER button (NIGHT SET mode)**

**TIMER CANCEL button**
- Cancels the timer setting.
- Cannot be used for the WEEKLY TIMER operation.

**SELECT button**
- Changes the clock, ON/OFF TIMER and WEEKLY TIMER settings.

**COMFORT/SENSOR button**
- COMFORT AIRFLOW and INTELLIGENT EYE operation.

**ON TIMER button**

**CLOCK button**

**WEEKLY button**

**PROGRAMME button**

**COPY button**

**BACK button**

**NEXT button**
Preparation Before Operation

**CAUTION**

Incorrect handling of batteries can result in injury from battery leakage, rupturing or heating, or lead to equipment failure.

Please observe the following precautions and use safely.

- If the alkaline solution from the batteries should get in the eyes, do not rub the eyes. Instead, immediately flush the eyes with tap water and seek the attention of a medical professional.
- Keep batteries out of reach of children. In the event that batteries are swallowed, seek the immediate attention of a medical professional.
- Do not expose batteries to heat or fire. Do not disassemble or modify batteries. The insulation or gas release vent inside the battery may be damaged, resulting in battery leakage, rupturing, or heating.
- Do not damage or peel off labels on the batteries.

■ To insert the batteries
  1. Slide the front cover to take it off.
  2. Insert 2 dry batteries AAA.LR03 (alkaline).
  3. Replace the front cover.

■ To fix the remote controller holder to a wall
  1. Choose a place from where the signals reach the unit.
  2. Fix the holder to a wall, a pillar, or similar location with the screws supplied with the holder.
  3. Place the remote controller in the remote controller holder.

■ Turn on the circuit breaker
  - After the power is turned on, the flaps of the indoor unit open and close once to set the reference position.

**NOTE**

**Notes on batteries**

- To avoid possible injury or damage from battery leakage or rupturing, remove the batteries when not using the product for long periods of time.
- The standard replacement time is 1 year. Both batteries should be replaced at the same time. Be sure to replace them with new size AAA. LR03 (alkaline) batteries.
- When battery power has run out, the LCD will begin blinking as an alert that the batteries need replacing. In some cases, when battery consumption is accelerated owing usage conditions, signal reception may decline before the LCD begins blinking.
- The batteries supplied with the remote controller are for initial operation. The batteries may run out in less than 1 year.

**Note on remote controller**

- Do not drop the remote controller. Do not get it wet.
To set the clock

1. Press \( \text{△} \). "000" appears on the LCD. "MON" and "0" blink.

2. Press \( \text{△} \) to set the current day of the week.

3. Press \( \text{△} \). "0" blinks.

4. Press \( \text{△} \) to set the clock to the present time.
   - Holding down \( \text{△} \) or \( \text{△} \) rapidly increases or decreases the displayed time.

5. Press \( \text{△} \).
   - Point the remote controller at the indoor unit when pressing the buttons.

**NOTE**

Note on setting the clock
- If the indoor unit’s internal clock is not set to the correct time, the ON/OFF TIMER and WEEKLY TIMER will not operate punctually.
The air conditioner operates with the operation mode of your choice. From the next time on, the air conditioner will operate with the same operation mode.

■ To start

1. Press \( \text{Mode} \) and select an operation mode.
   - Each pressing of the button changes the mode setting in sequence.

   For FTXM85/95
   - AUTO \( \rightarrow \) DRY \( \rightarrow \) COOL \( \rightarrow \) HEAT \( \rightarrow \) FAN

   For FTKM85/95
   - DRY \( \rightarrow \) COOL \( \rightarrow \) FAN

2. Press \( \text{Temp} \).
   - \( * \ ON * \) appears on the LCD.
   - The OPERATION lamp lights green.

■ To stop

Press \( \text{Temp} \) again.
   - \( * \ ON * \) disappears from the LCD.
   - The OPERATION lamp goes off.

■ To change the temperature setting

Press \( \text{Temp} \).
   - Press \( \uparrow \) to raise the temperature and press \( \downarrow \) to lower the temperature.
   - Each pressing of the button changes the temperature by 1°C.

<table>
<thead>
<tr>
<th>COOL operation</th>
<th>HEAT operation</th>
<th>AUTO operation</th>
<th>DRY or FAN operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>18 – 32°C</td>
<td>10 – 30°C</td>
<td>18 – 30°C</td>
<td>The temperature setting cannot be changed.</td>
</tr>
</tbody>
</table>

**NOTE**

**Notes on AUTO operation**
- In AUTO operation, the system selects an appropriate operation mode (COOL or HEAT) based on the indoor temperature and starts the operation.
- The system automatically reselects setting at a regular interval to bring the indoor temperature to the user-setting level.

**Note on DRY operation**
- Eliminates humidity while maintaining the indoor temperature as much as possible. It automatically controls temperature and airflow rate, so manual adjustment of these functions is unavailable.
Adjusting the Airflow Rate

You can adjust the airflow rate to increase your comfort.

To adjust the airflow rate setting

Press \[\text{Fan}\].

- Each pressing of \[\text{Fan}\] changes the airflow rate setting in sequence.

\[\text{AUTO} \rightarrow \text{Indoor unit quiet} \rightarrow \text{Airflow rate 1-5 (Low to High)}\]

- When the airflow is set to “\[\text{Fan}\]”, quiet operation starts and noise from the indoor unit will become quieter.
- In the quiet operation mode, the airflow rate is set to a weak level.
- In DRY operation, the airflow rate setting cannot be changed.
- At smaller airflow rates, the cooling (heating) effect is also smaller.

Tips for saving energy

Keeping the temperature setting at a moderate level helps save energy.
- Recommended temperature setting for cooling: 26-28°C, heating: 20-24°C

Cover windows with a blind or a curtain.
- Blocking sunlight and air from outdoors increases the cooling (heating) effect.

Keep the air filters clean.
- Clogged air filters cause inefficient operation and waste energy. Clean them once in about every 2 weeks. [Page 27]

If you are not going to use the air conditioner for a long period, for example in spring or autumn, turn off the circuit breaker.
- The air conditioner always consumes a small amount of electricity even while it is not operating.
Basic Operation

Adjusting the Airflow Direction

You can adjust the airflow direction to increase your comfort.

⚠️ CAUTION

- Always use a remote controller to adjust the angles of the flaps and louvres.
- If you attempt to move the flaps and louvres forcibly by hand when they are swinging, the mechanism may be damaged.
- Inside the air outlet, a fan is rotating at a high speed.

■ To start auto swing

Up and down airflow direction

Press 🔄.

- “��” appears on the LCD.
- The flaps (horizontal blades) will begin to swing.

Right and left airflow direction

Press 🔄.

- “��” appears on the LCD.
- The louvres (vertical blades) will begin to swing.

The 3-D airflow direction

Press 🔄 and 🔄.

- “��” and “��” appear on the LCD.
- The flaps and louvres move in turn.
- To cancel 3-D airflow, press either 🔄 or 🔄 again. The flaps or louvres will stop moving.

■ To set the flaps or louvres at the desired position

- This function is effective while the flaps or louvres are in auto swing mode.

Press 🔄 and 🔄 when the flaps or louvres reach the desired position.

- In the 3-D airflow, the flaps and louvres move in turn.
- “��” or “��” disappears from the LCD.

NOTE

Notes on airflow direction setting
- The movable range of the flaps varies according to the operation mode.

Note on 3-D airflow
- Using 3-D airflow circulates cold air, which tends to collect at the bottom of the room, and hot air, which tends to collect near the ceiling, throughout the room, preventing areas of cold and hot developing.
Basic Operation

COMFORT AIRFLOW / INTELLIGENT EYE Operation

COMFORT AIRFLOW operation: The airflow direction is upward while in COOL operation, and downward while in HEAT operation. This function prevents cold air from blowing directly on the occupants in the room.

INTELLIGENT EYE operation: The INTELLIGENT EYE sensor detects human movement. If no one is in the room for more than 20 minutes, the operation automatically changes to energy saving operation.

⚠️ CAUTION

- Do not place large objects near the INTELLIGENT EYE sensor. Also keep heating units and humidifiers outside the sensor’s detection area. This sensor can detect undesirable objects.
- Do not hit or violently push the INTELLIGENT EYE sensor. This can lead to damage and malfunction.

■ To start

Press 🌠 and select the desired mode.

- Each time 🌠 is pressed, a different setting option appears on the LCD.
- When INTELLIGENT EYE is selected, the INTELLIGENT EYE lamp lights green.

Display

- By selecting “CNT ⏯” from the following icons, the air conditioner will switch to COMFORT AIRFLOW operation combined with INTELLIGENT EYE operation.

- When the flaps (horizontal blades) are swinging, selecting any of the modes above will cause the flaps (horizontal blades) to stop.
- The lamp lights when human movement is detected.

■ To cancel

Press 🌠 until no icon is displayed.

- If the INTELLIGENT EYE operation was being used, the INTELLIGENT EYE lamp goes off.
Useful Functions

COMFORT AIRFLOW / INTELLIGENT EYE Operation

INTELLIGENT EYE operation is useful for energy saving

- People are detected in the sensing area.
- No people are detected in the sensing area.

The air conditioner is in normal operation while the sensor is detecting human movement.

The air conditioner will switch to energy-saving mode after 20 minutes.

Energy saving operation

- If no presence detected in the room for 20 minutes, the energy saving operation will start, and the INTELLIGENT EYE lamp goes off.
- If human movement is detected again, the INTELLIGENT EYE lamp lights up and energy saving operation terminates.
- This operation changes the temperature by –2°C in HEAT / +2°C in COOL / +2°C in DRY operation from the set temperature.
- When the room temperature exceeds 30°C, the operation changes the temperature by +1°C in COOL / +1°C in DRY operation from the set temperature.
- This operation decreases the airflow rate slightly in FAN operation only.

NOTE

Note on COMFORT AIRFLOW operation
- The airflow rate will be set to AUTO. If the up and down airflow direction is selected, COMFORT AIRFLOW operation will be cancelled.

Notes on INTELLIGENT EYE operation
- Application range is as follows.

  Vertical angle 90° (Side view)
  Horizontal angle 110° (Top view)

- The sensor may not detect moving objects further than 7m away. (Please see the application range)
- Sensor detection sensitivity changes according to the indoor unit location, the speed of passers-by, temperature range, etc.
- The sensor could also mistakenly detect pets, sunlight, fluttering curtains and light reflected off of mirrors as passers-by.
- NIGHT SET mode [Page 19] will not switch on during use of INTELLIGENT EYE operation.

Note on combination of COMFORT AIRFLOW operation and INTELLIGENT EYE operation
- The airflow rate will be set to AUTO. If the up and down airflow direction is selected, COMFORT AIRFLOW operation will be cancelled.
- Priority is given to the function of whichever button is pressed last.
POWERFUL Operation

POWERFUL operation quickly maximises the cooling effect in any operation mode. In this mode, the air conditioner operates at maximum capacity.

To start

- Press during operation.
  - “❄️” appears on the LCD.
  - POWERFUL operation ends in 20 minutes. Then the system automatically operates again with the previous settings which were used before POWERFUL operation.

To cancel

- Press again.
  - “❄️” disappears from the LCD.

NOTE

Notes on POWERFUL operation

- Pressing causes the settings to be cancelled, and “❄️” disappears from the LCD.
- POWERFUL operation will not increase the capacity of the air conditioner if the air conditioner is already in operation with its maximum capacity demonstrated.
  
  - In COOL, HEAT and AUTO operation
    - To maximise the cooling (heating) effect, the capacity of outdoor unit increases and the airflow rate becomes fixed at the maximum setting.
    - The temperature and airflow settings cannot be changed.
  
  - In DRY operation
    - The temperature setting is lowered by 2.5°C and the airflow rate is slightly increased.
  
  - In FAN operation
    - The airflow rate is fixed at the maximum setting.

Regarding the combination of POWERFUL and other operations

<table>
<thead>
<tr>
<th>Combination</th>
<th>Note</th>
</tr>
</thead>
<tbody>
<tr>
<td>POWERFUL + COMFORT AIRFLOW</td>
<td>Not available*</td>
</tr>
<tr>
<td>POWERFUL + ECONO</td>
<td></td>
</tr>
<tr>
<td>POWERFUL + OUTDOOR UNIT QUIET</td>
<td></td>
</tr>
</tbody>
</table>

*Priority is given to the function of whichever button is pressed last.
Useful Functions

ECONO / OUTDOOR UNIT QUIET Operation

ECONO operation enables efficient operation by limiting the maximum power consumption. This function is useful to prevent the circuit breaker from tripping when the unit operates alongside other appliances on the same circuit.

OUTDOOR UNIT QUIET operation lowers the noise level of the outdoor unit by changing the frequency and fan speed of the outdoor unit. This function is convenient during the night-time operation.

■ To start

Press \Econo\Quiet and select the desired mode.

\[\text{ECONO} \rightarrow \text{OUTDOOR UNIT QUIET} \rightarrow \text{Combination} \rightarrow \text{Blank} \rightarrow \text{No Setting}\]

■ To cancel

Press \Econo\Quiet until no icon is displayed.

NOTE

Notes on ECONO operation
• This operation is performed with lower power and therefore may not provide a sufficient cooling (heating) effect.
• Pressing \Econo\Quiet causes the settings to be cancelled, and “ \Econo\Quiet ” disappears from the LCD.
• If the power consumption level is already low, switching to ECONO operation will not reduce the power consumption.

Notes on OUTDOOR UNIT QUIET operation
• Even if the operation is stopped by using the remote controller or the indoor unit ON/OFF switch when using OUTDOOR UNIT QUIET operation, “ \Econo\Quiet ” will remain displayed on the remote controller.
• OUTDOOR UNIT QUIET operation will not reduce the frequency nor fan speed if they already are operating at reduced levels.
• This operation is performed with lower power and therefore may not provide a sufficient cooling (heating) effect.

Possible combinations of ECONO / OUTDOOR UNIT QUIET operation and basic operations

ON/OFF TIMER Operation

Timer functions are useful for automatically switching the air conditioner on or off at night or in the morning. You can also use the ON TIMER and OFF TIMER together.

[ON TIMER operation]

To set
• Check that the clock is correct.
  If not, set the clock to the present time. ▶Page 10

1. Press On.
   • “6:00” appears on the LCD.
   • “ON” blinks.
   • “Θ” and day of the week disappear from the LCD.

2. Press until the time setting reaches the point you like.
   • Each pressing of either button increases or decreases the time setting by 10 minutes.
   Holding down either button changes the setting rapidly.

3. Press On again.
   • “ON” and setting time appear on the LCD.
   • The TIMER lamp lights orange.

To cancel

Press Cancel.

• “ON” and setting time disappear from the LCD.
• “Θ” and day of the week appear on the LCD.
• The TIMER lamp goes off.

NOTE

Notes on TIMER operation

• When TIMER is set, the present time is not displayed.
• When using the ON/OFF TIMER to start/stop operation, the actual operation start/stop time may differ from the time set.
  (Maximum of about 10 minutes)

In the following cases, set the timer again.

• After the circuit breaker has turned off.
• After a power failure.
• After replacing the batteries in the remote controller.
On/Off Timer Operation

[Off Timer Operation]

- To Set
  - Check that the clock is correct. If not, set the clock to the present time. ▶ Page 10

1. Press \( \text{Off} \). “Off” appears on the LCD. “Off” blinks.
   - “○” and day of the week disappear from the LCD.

2. Press \( \text{on} \) until the time setting reaches the point you like.
   - Each pressing of either button increases or decreases the time setting by 10 minutes. Holding down either button changes the time setting rapidly.

3. Press \( \text{Off} \) again.
   - “Off” and setting time appear on the LCD.
   - The Timer lamp lights orange.

- To Cancel
  - Press \( \text{Off} \) again.
    - “Off” and setting time disappear from the LCD.
    - “○” and day of the week appear on the LCD.
    - The Timer lamp goes off.

[On/Off Timer Combination]

- To Combine
  - A sample setting for combining the 2 timers is shown below.

\[
\begin{array}{c}
\text{Present time: 23:00 (The unit is operating)} \\
\text{OFF Timer at 0:00} \\
\text{ON Timer at 14:00} \\
\text{Combined}
\end{array}
\]

Note

Night Set Mode

- When the OFF Timer is set, the air conditioner automatically adjusts the temperature setting (0.5°C up in Cool, 2.0°C down in Heat) to prevent excessive cooling (heating) during sleeping hours.
WEEKLY TIMER Operation

Up to 4 timer settings can be saved for each day of the week. This is convenient to adapt the WEEKLY TIMER to your family’s life style.

Setting example of the WEEKLY TIMER

The same timer settings are used from Monday through Friday, while different timer settings are used for the weekend.

</table>

- Up to 4 reservations per day and 28 reservations per week can be set using the WEEKLY TIMER. The effective use of the copy mode simplifies timer programming.
- The use of ON-ON-ON-ON settings, for example, makes it possible to schedule operating mode and set temperature changes. Furthermore, by using OFF-OFF-OFF-OFF settings, only the turn off time of each day can be set. This will turn off the air conditioner automatically if you forget to turn it off.
WEEKLY TIMER Operation

To use WEEKLY TIMER operation

Setting mode

- Make sure the day of the week and time are set. If not, set the day of the week and time.

Setting Displays

1. Press .
   - The day of the week and the reservation number of the current day will be displayed.
   - 1 to 4 settings can be made per day.

2. Press to select the desired day of the week and reservation number.
   - Pressing changes the reservation number and the day of the week.

3. Press .
   - The day of the week and reservation number will be set.
   - " and " blink.

4. Press to select the desired mode.
   - Pressing changes the “ON” or “OFF” setting in sequence.
   - Pressing puts the sequence in reverse.
   - In case the reservation has already been set, selecting “blank” deletes the reservation.
   - Proceed to STEP 9 if “blank” is selected.
   - To return to the day of the week and reservation number setting, press .

5. Press .
   - The ON/OFF TIMER mode will be set.
   - " and the time blink.
6. Press \( \text{ } \) to select the desired time.
   - The time can be set between 0:00 and 23:50 in 10-minute intervals.
   - To return to the ON/OFF TIMER mode setting, press \( \text{ } \).
   - Proceed to STEP 9 when setting the OFF TIMER.

7. Press \( \text{ } \).
   - The time will be set.
   - * \( \text{FMCW} \) and the temperature blink.

8. Press \( \text{ } \) to select the desired temperature.
   - The temperature can be set between 10°C and 32°C.
   - COOL or AUTO: The unit operates at 18°C even if it is set to 10 to 17°C.
   - HEAT or AUTO: The unit operates at 30°C even if it is set to 31 to 32°C.
   - To return to the time setting, press \( \text{ } \).
   - The set temperature is only displayed when the mode setting is on.

9. Press \( \text{ } \).
   - The temperature will be set and go to the next reservation setting.
   - The temperature is set while in ON TIMER operation, and the time is set while in OFF TIMER operation.
   - The next reservation screen will appear.
   - To continue further settings, repeat the procedure from STEP 4.

10. Press \( \text{ } \) to complete the setting.
    - Be sure to direct the remote controller toward the indoor unit and check for a receiving tone and blinking of the OPERATION lamp.
    - * \( \text{FMCW} \) appears on the LCD and WEEKLY TIMER operation is activated.
    - The TIMER lamp lights orange.

    Display

    - A reservation made once can be easily copied and the same settings used for another day of the week. Refer to Copy mode ➔ Page 23

NOTE

Notes on WEEKLY TIMER operation
- Do not forget to set the clock on the remote controller first. ➔ Page 10
- The day of the week, ON/OFF TIMER mode, time, and set temperature (only for ON TIMER mode) can be set with the WEEKLY TIMER. Other settings for the ON TIMER are based on the settings just before the operation.
- WEEKLY TIMER and ON/OFF TIMER operation cannot be used at the same time. The ON/OFF TIMER operation has priority if it is set while WEEKLY TIMER is still active. The WEEKLY TIMER will enter the standby state, and * \( \text{FMCW} \) will disappear from the LCD. When the ON/OFF TIMER is up, the WEEKLY TIMER will automatically become active.
- Only the time and set temperature with the WEEKLY TIMER are sent with the \( \text{ } \). Set the WEEKLY TIMER only after setting the operation mode, the airflow rate and the airflow direction ahead of time.
- Turning off the circuit breaker, power failure, and other similar events will render operation of the indoor unit’s internal clock inaccurate. Reset the clock. ➔ Page 10
- \( \text{ } \) can be used only for the time and temperature settings. It cannot be used to go back to the reservation number.
WEEKLY TIMER Operation

Copy mode

- A reservation made once can be copied to another day of the week. The whole reservation of the selected day of the week will be copied.

1. Press .

2. Press to confirm the day of the week to be copied.

3. Press .

- The whole reservation of the selected day of the week will be copied.

4. Press to select the destination day of the week.

5. Press .

- The reservation will be copied to the selected day of the week. The whole reservation of the selected day of the week will be copied.
- To continue copying the settings to other days of the week, repeat STEP 4 and STEP 5.

6. Press to complete the setting.

- "appears on the LCD and WEEKLY TIMER operation is activated.

NOTE

Note on COPY MODE

- The entire reservation of the source day of the week is copied in the copy mode.
- In the case of making a reservation change for any day of the week individually after copying the content of weekly reservations, press and change the settings in the steps of Setting mode.
**Confiming a reservation**

- The reservation can be confirmed.

<table>
<thead>
<tr>
<th>Setting Displays</th>
</tr>
</thead>
<tbody>
<tr>
<td>Normal</td>
</tr>
<tr>
<td>Confirmed</td>
</tr>
<tr>
<td>TUE</td>
</tr>
</tbody>
</table>

1. Press. The day of the week and the reservation number of the current day will be displayed.

2. Press to select the day of the week and the reservation number to be confirmed.
   - Pressing displays the reservation details.
   - To change the confirmed reserved settings, select the reservation number and press Next. The mode is switched to setting mode. Proceed to Setting mode STEP 4. Page 21.

3. Press to exit the confirmation mode.
   - " WEEKLY " appears on the LCD and WEEKLY TIMER operation is activated.
   - The TIMER lamp lights orange.

**To deactivate WEEKLY TIMER operation**

- Press Weekly while “ WEEKLY ” is displayed on the LCD.
  - “ WEEKLY ” disappears from the LCD.
  - The TIMER lamp goes off.
  - To reactivate the WEEKLY TIMER operation, press Weekly again.
  - If a reservation deactivated with Weekly is activated once again, the last reservation mode will be used.

**NOTE**

- If not all the reservation settings are reflected, deactivate the WEEKLY TIMER operation once. Then press Weekly again to reactivate the WEEKLY TIMER operation.
WEEKLY TIMER Operation

To delete a reservation

An individual reservation

1. Press .
   - The day of the week and the reservation number will be displayed.

2. Press to select the day of the week and the reservation number to be deleted.

3. Press Next .
   - " ON WEEKLY " and " ON " or " OFF " blink.

4. Press until no icon is displayed.
   - Pressing changes the ON/OFF TIMER mode in sequence.
   - Selecting "blank" will cancel any reservation you may have.

5. Press Next .
   - The selected reservation will be deleted.

6. Press .
   - If there are still other reservations, WEEKLY TIMER operation will be activated.

Reservations for each day of the week

- This function can be used for deleting reservations for each day of the week.
- It can be used while confirming or setting reservations.

1. Press .
   - The day of the week and the reservation number will be displayed.

2. Press to select the day of the week to be deleted.

3. Hold Weekly for about 5 seconds.
   - The reservation of the selected day of the week will be deleted.

4. Press .
   - If there are still other reservations, WEEKLY TIMER operation will be activated.

All reservations

Hold Weekly for about 5 seconds with the normal display.

- Be sure to direct the remote controller toward the indoor unit and check for a receiving tone.
- This operation cannot be used for the WEEKLY TIMER setting display.
- All reservations will be deleted.
Care and Cleaning

**CAUTION**
- Before cleaning, be sure to stop the operation and turn off the circuit breaker.
- Do not touch the aluminum fins of the indoor unit. If you touch those parts, this may cause an injury.

### Quick reference

#### Cleaning parts

**Front panel**
- Wipe it with a soft damp cloth.
- Only neutral detergent may be used.

**Air filter**
- Vacuum dust or wash the filter.
- Once every 2 weeks

**Indoor unit, outdoor unit and remote controller**
- Wipe them with a soft cloth.

### Notes on cleaning
For cleaning, do not use any of the following:
- Water hotter than 40°C
- Volatile liquid such as benzene, petrol and thinner
- Polishing compounds
- Rough materials such as a scrubbing brush

<table>
<thead>
<tr>
<th>Item</th>
<th>Part No.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Titanium apatite deodorizing filter</td>
<td>KAF970A48</td>
</tr>
</tbody>
</table>

**Titanium apatite deodorizing filter**
- Vacuum dust or replace the filter.
- [Cleaning] Once every 6 months
- [Replacement] Once every 3 years
Care and Cleaning

Air filter

1. Open the front panel.
   - Hold the front panel by the sides and open it.

2. Pull out the air filters.
   - Push the filter tab at the centre of each air filter a little upwards, then pull it down.

3. Wash the air filters with water or clean them with vacuum cleaner.
   - It is recommended to clean the air filters every 2 weeks.

If the dust does not come off easily

- Wash the air filters with neutral detergent thinned with lukewarm water, then dry them up in the shade.

4. Reattach the filters.

5. Close the front panel slowly.
   - Press the panel at both sides and the centre.

   - Make sure that the front panel is securely fixed.
Titanium apatite deodorizing filter

**Attaching**

1. Open the front panel and pull out the air filters. [Page 27]
2. Insert titanium apatite deodorizing filter.
   - Check that the filters are inserted securely under the tabs.

**Cleaning and Replacement**

1. Open the front panel and pull out the air filters. [Page 27]
2. Take off titanium apatite deodorizing filter.
   - Hold the recessed parts of the frame and unhook the 4 claws.
   - Remove the filters from the tabs.

**3. Clean or replace titanium apatite deodorizing filter.**

**[Cleaning]**

3-1. Vacuum dust, and soak in lukewarm water or water for about 10 to 15 minutes if very dirty.
   - Do not remove the filter from the frame when washing with water.

3-2. After washing, shake off remaining water and let them dry in the shade.
   - Do not wring out the filter to remove water from it.

**[Replacement]**

Remove the filter from the filter frame and prepare a new one.
   - Do not throw away the filter frame. Reuse the filter frame when replacing titanium apatite deodorizing filter.
   - When attaching the filter, check that the filter is properly set in the tabs.

4. Set the filters as they were and close the front panel.
   - Press the front panel at both sides and the center.

**NOTE**

- Operation with dirty filters:
  - cannot deodorise the air,
  - cannot clean the air,
  - results in poor cooling,
  - may cause odour.
- Dispose of old filters as non-flammable waste.
Care and Cleaning

Prior to a long period of non-use

1. Operate the FAN mode for several hours on a fine day to dry out the inside.
   1) Press \( \text{Mode} \) and select “\( \text{FAN} \)”.
   2) Press \( \text{Start} \) and start the operation.

2. After operation stops, turn off the circuit breaker for the room air conditioner.

3. Clean the air filters and reattach them. ➤Page 27

4. To prevent battery leakage, take out the batteries from the remote controller.

We recommend periodical maintenance

- In certain operating conditions, the inside of the air conditioner may get foul after several seasons of use, resulting in poor performance. It is recommended to have periodical maintenance by a specialist in addition to regular cleaning by the user.
- For specialist maintenance, please contact the dealer where you bought the air conditioner.
- The maintenance cost must be borne by the user.
FAQ

Indoor unit

The flaps do not start swinging immediately.
- The air conditioner is adjusting the position of the flaps. The flaps will start moving soon.

The air conditioner stops generating airflow during HEAT operation.
- Once the set temperature is reached, the airflow rate is reduced and operation stopped in order to avoid generating a cool airflow. Operation will resume automatically when the indoor temperature falls.

HEAT operation stops suddenly and a flowing sound is heard.
- The outdoor unit is defrosting. HEAT operation starts after the frost on the outdoor unit has been removed. This can take about 4 to 12 minutes.

Operation does not start soon.
- When was pressed soon after operation was stopped.
- When the mode was reselected.
  - This is to protect the air conditioner. You should wait for about 3 minutes.

Different sounds are heard.
- A sound like flowing water
  - This sound is generated because the refrigerant in the air conditioner is flowing.
  - This is a pumping sound of the water in the air conditioner and can be heard when the water is pumped out from the air conditioner during COOL or DRY operation.
- Blowing sound
  - This sound is generated when the flow of the refrigerant in the air conditioner is switched over.
- Ticking sound
  - This sound is generated when the cabinet and frame of the air conditioner slightly expand or shrink as a result of temperature changes.
- Whistling sound
  - This sound is generated when refrigerant flows during defrosting operation.
- Clicking sound during operation or idle time
  - This sound is generated when the refrigerant control valves or the electrical parts operate.
- Clopping sound
  - This sound is heard from the inside of the air conditioner when the exhaust fan is activated while the room doors are closed. Open the window or turn off the exhaust fan.

Outdoor unit

The outdoor unit emits water or steam.
- In HEAT operation
  - The frost on the outdoor unit melts into water or steam when the air conditioner is in defrosting operation.
- In COOL or DRY operation
  - Moisture in the air condenses into water on the cool surface of the outdoor unit piping and drips.
## Troubleshooting

Before making an inquiry or a request for repair, please check the following. If the problem persists, consult your dealer.

### Not a problem
This case is not a problem.

### Check
Please check again before requesting repairs.

### The air conditioner does not operate

<table>

<tr>
<td>The ON/OFF TIMER does not operate according to the settings.</td>
<td>- Check if the ON/OFF TIMER and the WEEKLY TIMER are set to the same time. Change or deactivate the settings in the WEEKLY TIMER.</td>
</tr>
</tbody>
</table>

NOTE

Notes on the operating conditions
- If operation continues under any conditions other than those listed in the table, a safety device may activate to stop the operation.
- Dew may form on the indoor unit and drip from it when COOL or DRY operation is selected.

When the Need Arises

Troubleshooting

■ Call your dealer immediately

⚠️ WARNING

When an abnormality (such as a burning smell) occurs, stop operation and turn off the circuit breaker.
- Continued operation in an abnormal condition may result in problems, electric shock or fire.
- Do not attempt to repair or modify the air conditioner by yourself.
- Incorrect work may result in electric shock or fire.
- Consult the dealer where you bought the air conditioner.

If one of the following symptoms takes place, call your dealer immediately.

- The power cord is abnormally hot or damaged.
- An abnormal sound is heard during operation.
- The circuit breaker, a fuse, or the earth leakage circuit breaker cuts off the operation frequently.
- A switch or a button often fails to work properly.
- There is a burning smell.
- Water leaks from the indoor unit.

Turn off the circuit breaker and call your dealer.

■ After a power failure
- The air conditioner automatically resumes operation in about 3 minutes. Please wait for a while.

■ Lightning
- If there is a risk lightning could strike in the neighbourhood, stop operation and turn off the circuit breaker to protect the system.

■ Disposal requirements
- Dismantling of the unit, handling of the refrigerant, oil and other parts, should be done in accordance with the relevant local and national regulations.
When the Need Arises

**Fault diagnosis by remote controller**
- In case the air conditioner is malfunctioning, you can check the error code via the remote controller before consulting with service personnel and informing them of the malfunction code.

1. When is held down for about 5 seconds, “00” blinks in the temperature display section.

2. Press repeatedly until a long beep is produced.
   - The code indication changes as shown below, and notifies you with a long beep.

*The remote controller may differ from some models.*

**NOTE**
- A short beep indicate non-corresponding codes.
- To cancel the code display, hold down for about 5 seconds. The code display also clears if no button is pressed for 1 minute.
MEMO
The two-dimensional bar code is a manufacturing code.
